Report on the Audit of the Financial Statements

www.grantthornton.lc

Opinion

We have audited the financial statements of **Antigua Brewery Limited**, which comprise the statement of financial position as at December 31, 2019, and the statement of changes in equity, statement of profit or loss, and statement of cash flows for the year then ended, and notes to the financial statements, including significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of **Antigua Brewery Limited** as at December 31, 2019, and its financial performance and cash flows for the year then ended in accordance with the International Financial Reporting Standards for Small and Medium-sized Entities (IFRS for SMEs).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in St. Vincent and the Grenadines, and we have fulfilled our ethical responsibilities in accordance with these requirements and IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS for SMEs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatements, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. "Reasonable assurance" is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purposes of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, then we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and where applicable, related safeguards.

The Engagement Partner on the audit resulting in this independent auditors' report is Floyd A. Patterson.

Antigua Brewery Limited

Notes to the Financial Statements

For the Year Ended December 31, 2019

(in Eastern Caribbean dollars)

1. Incorporation and General Information

Antigua Brewery Limited (“the Company”) is a limited liability company incorporated on May 16, 1991 under the laws of Antigua and Barbuda. The registered office of the Company is located at P.O. Box 241, Crabb’s Peninsula, Antigua.

The Company is a 93.01% owned subsidiary of International Brewing Limited, a company incorporated in St. Lucia. International Brewing Limited is a fully owned subsidiary of Cerveceria Nacional Dominicana, S.A, a company incorporated in the Dominican Republic. Tenedora CND, a company incorporated in the Dominican Republic owns 99.66% (2017: 99.66%) shares of Cerveceria Nacional Dominicana, S.A. On May 11, 2013, Ambev Brasil Bebidas, SA (ultimate parent company), acquired majority ownership of Tenedora CND. As at December 31, 2018, Ambev Brasil Bebidas, SA owns 50.8% (2017: 50.8%) shares of Tenedora CND.

2. Nature of Operations

The Company is engaged in the distribution of aerated beverages and beer brewed under its label and other products under license.

3. Basis of Preparation

The financial statements of Antigua Brewery Limited have been prepared in accordance with the ‘International Financial Reporting Standard for Small and Medium-sized Entities’ (IFRS for SMEs). They have been prepared under the historical cost convention.

The preparation of financial statements in conformity with the IFRS for SMEs requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the company’s accounting policies. Areas involving a higher degree of judgment or complexity, or areas where assumptions and estimations are significant to the financial statements, are disclosed in Note 6.

4. Summary of Accounting Policies

4.1. Overall considerations

The financial statements have been prepared using the significant accounting policies and measurement bases summarised below.

4.2. Cash and Cash Equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, together with other short-term, highly liquid investments that are readily convertible into known cash and which are subject to an insignificant risk of changes in value.

4.3. Financial Instruments

Recognition, Initial Measurement and Derecognition

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instrument and are measured initially at fair value adjusted for transaction costs. Subsequent measurement of financial assets and financial liabilities is described below.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and all substantial risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

Antigua Brewery Limited

Notes to the Financial Statements For the Year Ended December 31, 2019

(in Eastern Caribbean dollars)

4. Summary of Accounting PoliciesCont'd

4.3. Financial Instruments

Classification and Subsequent Measurement of Financial Assets

For the purpose of subsequent measurement, financial assets are classified into loans and receivables upon initial recognition.

All financial assets are reviewed for impairment at least at each reporting date to identify whether there is any objective evidence that a financial asset or a group of financial assets is impaired. Different criteria to determine impairment are applied for each category of financial assets, which are described below.

All income and expenses relating to financial assets that are recognised in profit or loss are presented within the finance costs or finance income, except for impairment of trade receivables which is presented within 'administrative and other expenses'.

Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial recognition, these are measured at amortised cost using the effective interest method, less provision for impairment. Discounting is omitted where the effect of discounting is immaterial. The Company's cash and cash equivalents, trade and most other receivables fall into this category of financial instruments.

Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received that a specific counterparty will default. Receivables that are not considered to be individually impaired are reviewed for impairment in groups, which are determined by reference to the industry and region of the counterparty and other shared credit risk characteristics. The impairment loss estimate is then based on recent historical counterparty default rates for each identified group.

The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the statement of comprehensive income. When a trade receivable is uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited in the statement of comprehensive income.

Classification and Subsequent Measurement of Financial Liabilities

The Company's financial liabilities include short-term borrowings and trade and other payables. Financial liabilities are measured subsequently at amortised cost using the effective interest method.

4.4 Inventories

Inventories are stated at the lower of cost and net realizable value. Cost includes purchase price, duties, handling and transportation costs. Cost is determined using the weighted-average method. Net realizable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

At each reporting date, inventories are assessed for impairment. If inventory is impaired, the carrying amount is reduced to its net realisable value; the impairment loss is recognised immediately in the statement of comprehensive income.

Antigua Brewery Limited

Notes to the Financial Statements

For the Year Ended December 31, 2019

(in Eastern Caribbean dollars)

4. Summary of Accounting Policies*Cont'd*

4.5. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is necessary to complete and prepare the asset for its intended use or sale. Other borrowing costs are expensed in the period in which they are incurred and reported in finance costs.

4.6. Impairment of non-financial assets

For impairment assessment purposes, assets are grouped at the lowest levels for which there are largely independent cash inflows (cash-generating units). As a result, some assets are tested individually for impairment and some are tested at cash-generating unit level. Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's or cash generating unit's carrying amount exceeds its recoverable amount, which is the higher of fair values less costs of disposal and value-in-use. To determine the value-in-use, management estimates expected future cash flows from each cash-generating unit and determines a suitable interest rate in order to calculate the present value of those cash flows. Discount factors are determined individually for each cash-generating unit and reflect management's assessment of respective risk profiles, such as market and asset-specific risks factors.

Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date. An impairment loss is reversed if the asset's or cash-generating unit's recoverable amount exceeds its carrying amount.

4.7. Provisions for other liabilities and charges

Provisions for other liabilities and charges are recognised when the Company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made. Timing or amount of the outflow may still be uncertain. Provisions are not recognized for future operating losses.

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the reporting date, including the risks and uncertainties associated with the present obligation. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. Provisions are discounted to their present values, where the time value of money is material.

No liability is recognized if an outflow of economic resources as a result of present obligation is not probable. Such situations are disclosed as contingent liabilities unless the outflow of resources is remote.

4.8. Equity

Share capital represents the nominal value of shares that have been issued. Incremental costs directly attributable to the issue of new ordinary shares are shown as a deduction, net of tax, from the proceeds.

Retained earnings include all current and prior period retained profits or losses.

All transactions with owners of the Company are recorded separately within equity.

Antigua Brewery Limited

Notes to the Financial Statements

For the Year Ended December 31, 2019

(in Eastern Caribbean dollars)

4. Summary of Accounting PoliciesCont'd

4.9. Revenue

Revenue arises from the sale of goods. It is measured at the fair value of consideration received or receivable, excluding sales taxes, rebates and trade discounts. The Company imports products from St. Vincent and distributes them to a local distributor which sells the products to the ultimate consumer and recognises a commission from the transaction. The Company applies the revenue recognition criteria set out below to each separately identifiable component of the sales transaction. The consideration received from these multiple-component transactions is allocated to each separately identifiable component in proportion to its relative fair value.

Commission on sale of goods

Commission on sale of goods is recognised when the Company has transferred to the buyer the significant risks and rewards of ownership, generally when the customer has taken undisputed delivery of the goods.

Other income earned by the Company is recognised on the accrual basis.

4.10. Operating expenses

Operating expenses are recognised in profit or loss upon utilisation of the service or as incurred.

4.11. Foreign currency translation

Functional and presentation currency

The financial statements are presented in Eastern Caribbean dollars, which is also the Company's functional currency.

Foreign currency transactions and balances

Foreign currency transactions are translated into the functional currency of the Company, using the exchange rates prevailing at the dates of the transactions (spot exchange rate). Foreign exchange gains and losses resulting from the settlement of such transactions and from the re-measurement of monetary items denominated in foreign currency at year-end exchange rates are recognised in the statement of comprehensive income.

Non-monetary items are not translated at year-end and are measured at historical cost (translated using the exchange rates at the transaction date), except for non-monetary items measured at fair value which are translated using the exchange rates at the date when fair value was determined.

Foreign exchange gains and losses are presented in the statement of comprehensive income within other income.

4.12. Operating leases

The Company leases certain items of property, plant and equipment. Leases where a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments under operating leases are charged to the statement of comprehensive income on a straight line basis over the period of the lease.

4.13. Income taxes

Tax expense recognized in the statement of comprehensive income comprises the sum of deferred tax and current tax not recognized in other comprehensive income or directly in equity.

Current income tax assets and/or liabilities comprise those obligations to, or claims from, fiscal authorities relating to the current or prior reporting periods, that are unpaid at the reporting date. Current tax is payable on taxable profit, which differs from profit or loss in the financial statements. Calculation of current tax is based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period in Antigua and Barbuda.

Antigua Brewery Limited

Notes to the Financial Statements

For the Year Ended December 31, 2019

(in Eastern Caribbean dollars)

4. Summary of Accounting PoliciesCont'd

4.13. Income taxCont'd

Deferred income taxes are calculated using the liability method on temporary differences between the carrying amounts of assets and liabilities and their tax bases. Deferred tax assets and liabilities are calculated, without discounting, at tax rates that are expected to apply to their respective period of realization, provided those rates are enacted or substantially enacted by the end of the reporting period in Antigua and Barbuda.

Deferred tax assets are recognized to the extent that it is probable that the underlying tax loss or deductible temporary difference will be utilized against future taxable income. This is assessed based on the Company's forecast of future operating results, adjusted for significant non-taxable income and expenses and specific limits on the use of any unused tax loss or credit. Deferred tax liabilities are always provided for in full.

Deferred tax assets and liabilities are offset only when the Company has a right and intention to set off current tax assets and liabilities from the same taxation authority.

Changes in deferred tax assets or liabilities are recognized as a component of tax income or expense in the statement of comprehensive income, except where they relate to items that are recognized in other comprehensive income (such as the revaluation of land) or directly in equity, in which case the related deferred tax is also recognized in other comprehensive income or equity, respectively.

5. Financial Instruments Risk

The Company's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance.

Risk management is carried out by management under policies approved by the Board of Directors. The Board identifies and evaluates financial risks in close cooperation with the Company's management.

(a) Financial Risk Factors

i) Market Risk

1 Foreign Exchange Risk

Foreign exchange risk is the risk that the value of a financial instrument will fluctuate because of changes in foreign exchange rates. Substantially all of the Company's transactions, assets and liabilities are denominated in Eastern Caribbean dollars or United States dollars. Therefore, there is no significant exposure to foreign exchange risk.

2 Price Risk

The Company has no investments in equity securities and thus is not exposed to equity securities price risk. The Company is not exposed to commodity price risk.

ii) Interest Risk

1 Cash Flow and Fair Value Interest Rate Risk

The Company's interest rate risk arises from net interest-bearing liabilities held with financial institutions and related parties. Borrowings issued at variable rates expose the Company to cash flow interest rate risk. Borrowings issued at fixed rates expose the Company to fair value interest rate risk. The interest-bearing liabilities generally have fixed interest rates and as a result there is no significant exposure to the Company as a result of cash flow interest rate risk.

Antigua Brewery Limited

Notes to the Financial Statements For the Year Ended December 31, 2019

(in Eastern Caribbean dollars)

5. Financial Instruments RiskCont'd

(a) Financial Risk Factors

iii) Credit Risk

Credit risk arises from the possibility that counterparties may default on their obligations to the Company. Credit risk arises from cash as well as credit exposures to customers, including outstanding receivables. There is no independent rating of customers and no collateral is held as security for the financial assets. However, management assesses the credit quality of the customer by taking into consideration its financial position, length of relationship, past experience and other factors. Trade receivables and other receivables are monitored on an ongoing basis. Individual risk limits are set based on internal ratings in accordance with limits set by the Board of Directors. No collateral is held as security for the financial assets. With respect to cash, credit risk is mitigated by the short-term and/or liquid nature of its cash financial assets mainly in bank deposits and placements, which are placed with financial institutions of high credit standing.

The Company has made adequate provision for any potential credit losses and the amount of the Company's maximum exposure to credit risk is indicated by the carrying amount of its financial assets. The table below summarizes the Company's maximum exposure to credit risk for the components of the statement of financial position.

Maximum Exposure to Credit Risk

	2019	2018
	\$	\$
Cash and cash equivalents	19,153,811	14,422,423
Trade and other receivables	1,657,463	1,521,790
Due from affiliated companies	4,824,717	4,665,195
	25,635,991	20,609,408

Geographic

Substantially all of the Company's counterparties are within Antigua and Barbuda.

Industry Sectors

The following table analyses the Company's credit risk exposure at their carrying amounts as categorised by the industry sectors of the counterparties.

	Commercial Companies	Financial Institutions	Related Parties	Total
	\$	\$	\$	\$
Cash	0	19,153,811	0	19,153,811
Trade and other receivables	1,657,463	0	0	1,657,463
Due from affiliated companies	0	0	4,824,717	4,824,717
At December 31, 2019	1,657,463	19,153,811	4,824,717	25,635,991
At December 31, 2018	1,521,790	14,422,423	4,665,195	20,609,408

iv) Liquidity Risk

Liquidity risk is the risk that the Company is unable to meet its payment obligations associated with its financial liabilities when they fall due.

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. The Company maintains flexibility in funding by maintaining an available line of credit with a financial institution.

All of the Company's liabilities are contractually or constructively due within twelve months of the reporting date.

Antigua Brewery Limited

Notes to the Financial Statements For the Year Ended December 31, 2019

(in Eastern Caribbean dollars)

5. Financial Instruments RiskCont'd

(b) Fair Value of Financial Assets and Liabilities

Fair value amounts represent estimates of the consideration that would currently be agreed upon between knowledgeable, willing parties who are under no compulsion to act and is best evidenced by a quoted market value, if one exists. With the exception of cash, none of the company's financial instruments are traded in a formal market. Estimated fair values are assumed to approximate the carrying values of current financial assets and liabilities due to their short-term nature.

(c) Capital risk management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns and benefits for stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividend paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

6. Significant Management Judgement in Applying Accounting Policies and Estimation Uncertainty

When preparing the financial statements, management makes a number of judgements, estimates and assumptions about the recognition and measurement of assets, liabilities, income and expenses.

Estimation Uncertainty

Information about estimates and assumptions that have the most significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may be substantially different.

Impairment of Non-Financial Assets

In assessing impairment, management estimates the recoverable amount of each asset or cash-generating units based on expected future cash flows and use an interest rate to discount them. Estimation uncertainty relates to assumptions about future operating results and the determination of a suitable discount rate.

7. Cash and Cash Equivalents

	2019	2018
	\$	\$
Cash on hand	1,000	1,000
Cash at bank	19,152,811	14,421,423
	<u>19,153,811</u>	<u>14,422,423</u>

8. Trade and Other Receivables

	2019	2018
	\$	\$
Trade receivables	1,657,182	1,433,856
Prepayments	281	1,872
Antigua & Barbuda sales tax refundable	0	86,062
	<u>1,657,463</u>	<u>1,521,790</u>

All amounts are short-term. The net carrying value of trade and other receivables is considered a reasonable approximation of fair value.

Antigua Brewery Limited

Notes to the Financial Statements For the Year Ended December 31, 2019

(in Eastern Caribbean dollars)

8. Trade and Other Receivables*Cont'd*

As at reporting date, no trade receivables were impaired (2017: Nil). The aging analysis of trade receivables is as follows:

	2019	2018
	\$	\$
Neither past due nor impaired	1,248,353	285,410
Greater than 15 days but less than 60 days	408,830	153,692
Overdue by more than 60 days	0	994,754
	<u>1,657,183</u>	<u>1,433,856</u>
