## **INFORMATION TO BE INCLUDED IN FORM ECSRC-OR**

### **1. Financial Statements**

Provide Financial Statements for the period being reported in accordance with International Accounting Standards. The format of the financial statements should be similar to those provided with the registration statement. Include the following:

- (a) Condensed Balance Sheet as of the end of the most recent financial year and just concluded reporting period.
- (b) Condensed Statement of Income for the just concluded reporting period and the corresponding period in the previous financial year along with interim three, six and nine months of the current financial year and corresponding period in the previous financial year.
- (c) Condensed Statement of Cash Flows for the just concluded reporting period and the corresponding period in the previous financial year along with the interim three, six and nine months of the current financial year and the corresponding period in the previous financial year.
- (d) By way of *Notes to Condensed Financial Statements*, provide explanation of items in the financial statements and indicate any deviations from generally accepted accounting practices.

### **2. Management's Discussion and Analysis of Financial Condition and Results of Operation.**

Discuss the reporting issuer's financial condition covering aspects such as liquidity, capital resources, changes in financial condition and results of operations during the reporting period. Discussions of liquidity and capital resources may be combined whenever the two topics are interrelated. Discussion of material changes should be from the end of the preceding financial year to the date of the most recent interim report.

The Management's Discussion and Analysis should disclose sufficient information to enable investors to judge:

1. The quality of earnings;
2. The likelihood that past performance is indicative of future performance; and
3. The issuer's general financial condition and outlook.

It should disclose information over and above that which is provided in the management accounts and should not be merely a description of the movements in the financial statements in narrative form or an otherwise uninformative series of technical responses. It should provide management's perspective of the company that enables investors to view the business from the vantage point of management.

The discussion should focus on aspects such as liquidity; capital resources; changes in financial condition; results of operations; material trends and uncertainties and measures

**taken or to be taken to address unfavourable trends; key performance indicators; and non-financial indicators.**

### ***General Discussion and Analysis of Financial Condition***

1. The Bank's Net Profit After Tax for the first quarter of the 2021 financial year is recorded at \$4.9M; an increase from the \$3.8M outturn as at December 31st, 2019.
2. The Bank's bottom-line performance continues to be driven by:
  - i. effective credit risk management along with consistent yields on a high quality and expanding credit portfolio.
  - ii. favourable returns on the investment portfolio albeit lower than prior period.
  - iii. effective management of the interest expense considering the value of the deposit portfolio.
  - iv. growth in other income.
3. Total Revenue increased by 8.5% or \$1.5M from \$17.9M in December 2019 to \$19.4M in December 2020, due primarily to growth in Other Income (up by 32%).
4. Total Expenditure stood at \$12.8M, which greater than the same period last year by \$18K; this performance is due primarily to the increase in interest expense as at the reporting period.
  - i. An increase of 12% or \$0.2M was realized in Interest Expense, while Operating Expenses was less than the prior period by 2%.
  - ii. No impairment charge on both loans and investment was applied for this quarter as there was no increase in Expected Losses (ECL) based on the assessment done. Comparatively, no impairment charge was made in the corresponding period in 2019.
5. Total Assets increased from the September 2020 position by 5% or \$61.7M, due to:
  - i. Investments: increased by \$34.4M or 9%, a consequence of an increase in both the internally and externally managed portfolios.
  - ii. Customer Loans: increased by \$6.5M or 1%, with the largest dollar value change being realized in Mortgage Loans.
  - iii. Other Receivables and Prepayments: increased by \$4.5M over the previous period.
  - iv. Cash and Cash Equivalents: increasing by \$15.3M or 6% over the prior period.
6. Other Liabilities grew by \$6.7M; the effect of increased card related transactions payable.
7. Customers' Deposits - the Bank's largest liability (largest funding source) increased by \$39.8M or 3%; the net effect of a decline in Savings Deposits and increases in all other deposit categories.
8. The Bank's Equity position at December 31st, 2020 had a net growth of \$13.5M overall impacted by:
  - i. Increase in Retained Earnings arising from the direct impact of the first quarter's Net Profit After Taxes of \$4.9M.
  - ii. Net unrealized gains on the international investment portfolios of \$4.8M, representing increases in the fair value of the instruments within the portfolio. This performance was impacted by a faster economic rebound in the US economy than expected boosting investors' confidence. The pandemic remained in focus throughout the quarter as the concern of a "second wave" materialized. Conversely, the market appeared to improve as reports of the progress on the approval and distribution of a vaccine would begin by the end of the year resulting in unrealized gains.
  - iii. The realized gains on equity instruments of \$3.8M arising from the classification of equity instruments as Fair Value through Other Comprehensive Income (FVOCI) rather than Investment Income as elected by the Bank.
9. The Capital Adequacy (CAR) and Non-Performing Loans (NPL) ratios were all maintained within prudential benchmarks:
  - i. The CAR stood at 11.8% improving when compared to September 2020 position.
  - ii. The NPL ratio remained under 1%; reducing slightly from September 2020 position of 0.26% and now stands at 0.25%.

### **Liquidity and Capital Resources**

**Provide a narrative explanation of the following (but not limited to):**

- i) The reporting issuer's financial condition covering aspects such as liquidity, capital resources, changes in financial condition and results of operations.**
- ii) Any known trends, demands, commitments, events or uncertainties that will result in, or that are reasonably likely to result in, the issuer's liquidity increasing or decreasing in any material way. If a deficiency is identified, indicate the course of action that the reporting issuer has taken or proposes to take to remedy the deficiency.**
- iii) The issuer's internal and external sources of liquidity and any material unused sources of liquid assets.**
- iv) Provisions contained in financial guarantees or commitments, debt or lease agreements or other arrangements that could trigger a requirement for an early payment, additional collateral support, changes in terms, acceleration of maturity, or the creation of an additional financial obligation such as adverse changes in the issuer's financial ratios, earnings, cash flows or stock price or changes in the value of underlying, linked or indexed assets.**

- v) Circumstances that could impair the issuer's ability to continue to engage in transactions that have been integral to historical operations or are financially or operationally essential or that could render that activity commercially impracticable such as the inability to maintain a specified level of earnings, earnings per share, financial ratios or collateral.
- vi) Factors specific to the issuer and its markets that the issuer expects will affect its ability to raise short-term and long-term financing, guarantees of debt or other commitment to third parties, and written options on non-financial assets.
- vii) The relevant maturity grouping of assets and liabilities based on the remaining period at the balance sheet date to the contractual maturity date. Commentary should provide information about effective periods and the way the risks associated with different maturity and interest profiles are managed and controlled.
- viii) The issuer's material commitments for capital expenditures as of the end of the latest fiscal period, and indicate the general purposes of such commitments and the anticipated source of funds needed to fulfil such commitments.
- ix) Any known material trends, favorable or unfavorable, in the issuer's capital resources, including any expected material changes in the mix and relative cost of capital resources, considering changes between debt, equity and any off-balance sheet financing arrangements.

#### *Discussion of Liquidity and Capital Resources*

The Loan to Deposit (LTD) ratio which is an indicator of the bank's liquidity position stood at 46% which is 29 percentage points below the minimum prudential guideline. This result suggests the availability of excess depositor's funds for loans or investing. Given the highly competitive loan market these funds have been employed in investing activities as observed in the position of the debt exposure ratio.

The Bank's Capital Adequacy Ratio (CAR) increased to 11.8% while the Debt Exposure ratio stood at 81%.

### Off Balance Sheet Arrangements

Provide a narrative explanation of the following (but not limited to):

- i) Disclosures concerning transactions, arrangements and other relationships with unconsolidated entities or other persons that are reasonably likely to materially affect liquidity or the availability of, or requirements for capital resources.
- ii) The extent of the issuer's reliance on off-balance sheet arrangements should be described fully and clearly where those entities provide financing, liquidity, market or credit risk support, or expose the issuer to liability that is not reflected on the face of the financial statements.
- iii) Off-balance sheet arrangements such as their business purposes and activities, their economic substance, the key terms and conditions of any commitments, the initial on-going relationship with the issuer and its affiliates and the potential risk exposures resulting from its contractual or other commitments involving the off-balance sheet arrangements.
- iv) The effects on the issuer's business and financial condition of the entity's termination if it has a finite life or it is reasonably likely that the issuer's arrangements with the entity may be discontinued in the foreseeable future.

The Bank's Off-balance sheet arrangements pertain specifically to undrawn loan commitment, guarantees and letters of credit, as is common in the normal course of commercial banking. This exposure is considered and monitored in the management of the Bank's liquidity position. There were no unusual off balance sheet arrangements during the quarter.

## Results of Operations

In discussing results of operations, issuers should highlight the company's products and services, facilities and future direction. There should be a discussion of operating considerations and unusual events, which have influenced results for the reporting period. Additionally, any trends or uncertainties that might materially affect operating results in the future should be discussed.

Provide a narrative explanation of the following (but not limited to):

- i) Any unusual or infrequent events or transactions or any significant economic changes that materially affected the amount of reported income from continuing operations and, in each case, the extent to which income was so affected.
- ii) Significant components of revenues or expenses that should, in the company's judgment, be described in order to understand the issuer's results of operations.
- iii) Known trends or uncertainties that have had or that the issuer reasonably expects will have a material favorable or unfavorable impact on net sales or revenues or income from continuing operations.
- iv) Known events that will cause a material change in the relationship between costs and revenues (such as price increases, costs of labour or materials), and changes in relationships should be disclosed.
- v) The extent to which material increases in net sales or revenues are attributable to increases in prices or to increases in the volume or amount of goods or services being sold or to the introduction of new products or services.
- vi) Matters that will have an impact on future operations and have not had an impact in the past.
- vii) Matters that have had an impact on reported operations and are not expected to have an impact upon future operations
- viii) Off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships that have or are reasonably likely to have a current or future effect on the registrant's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.
- ix) Performance goals, systems and, controls.

### *Overview of Results of Operations*

There were no unusual events or transactions materially affecting the reported net income this reporting period.

The significant components of revenue this reporting period were interest income on loans and investments and other non-interest income earned for the Bank's services. For expenses, the significant components were activities driven by the Bank's operations.

The first quarter of the Bank's financial year continues to be impacted by the various uncertainties as it relates to the COVID-19 pandemic on the economy. This is certainly expected to impact the organization's performance.

No new products or services are expected within the remainder of the year neither were there any matters that are expected to have an impact on future operations that didn't do so before.

There are no off-balance sheet arrangements or transactions that are expected to impact the financial position.

### **3. Disclosure about Risk Factors.**

Provide a discussion of the risk factors that may have an impact on the results from operations or on the financial conditions. Avoid generalised statements. Typical risk factors include untested products, cash flow and liquidity problems, dependence on a key supplier or customer, management inexperience, nature of business, absence of a trading market (specific to the securities of the reporting issuer), etc. Indicate if any risk factors have increased or decreased in the time interval between the previous and current filing.

The following are the major risk factors:

Credit risk is the risk that counter-parties will cause a financial loss to the bank by failing to discharge their obligations. Credit exposures arise principally in lending activities that lead to loan and advances, and investing activities that bring debt and equity instruments on the banks asset portfolio. This risk is managed through regular analysis and review of counter-parties and obtaining adequate collateral. At reporting date, this risk is stable as indicated by a low NPL ratio. Additionally, the repayment moratorium on loans will continue to temporarily mitigate the risk cause by the COVID-19 pandemic.

Market risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in market price. The Bank's relatively large foreign investment portfolio exposes the Bank to market risk.

Liquidity risk is the risk of fluctuation in cash flow that can hinder the Bank's ability to honour its commitment when they are due. The Bank has been experiencing excessive liquidity in recent times and this is expected continue in the short run. The Bank's policy on liquidity sets out the process that guides the management of liquidity.

#### 4. Legal Proceedings.

A legal proceeding need only be reported in the ECSRC – OR filed for the period in which it first became a reportable event and in subsequent interim reports in which there have been material developments. Subsequent Form ECSRC – OR filings in the same financial year in which a legal proceeding or a material development is reported should reference any previous reports in that year. Where proceedings have been terminated during the period covered by the report, provide similar information, including the date of termination and a description of the disposition thereof with respect to the reporting issuer and its subsidiaries.

Legal proceedings were those for entering judgments in the ordinary course of business, in respect of delinquent borrowers.

There were no proceedings commencing during the period.

There was the conclusion to the matter: Danielle Dubisette v. GCBL (GDAHCV2007/0569)

Mr. Dubisette initiated a Claim against the Bank over a typographical error made in an offer letter in 2000 in his monthly loan repayment figure.

Justice Glasgow ruled in favour of Grenada Co-operative Bank Ltd. In his judgment handed down on December 22, 2020, the Judge ruled as follows:

1. The Claimant is not entitled to an order of specific performance .
2. The Claimant is not entitled to an account of all deductions, damages for illegal deductions, loss of business and damage to reputation.
3. The claim filed by the Claimant on 10th December 2007 is dismissed.
4. The defendant is entitled to costs in the sum of \$2,000.
