INFORMATION TO BE INCLUDED IN FORM ECSRC-K

1. Business.

Provide a description of the developments in the main line of business including accomplishments and future plans. The discussion of the development of the reporting issuer's business need only include developments since the beginning of the financial year for which this report is filed.

The year was challenging, yet a very successful one for the Bank of St. Vincent and the Grenadines (BOSVG). Emerging trends in the global, regional and local environment are challenging our traditional business model. New players are entering the local market as longstanding names make their exit; technological developments are blurring the lines between banking and other parts of the economy and; mounting regulatory requirements restrict the way we can respond.

Notwithstanding these challenges, we continued to ensure the highest standards of corporate governance and adherence to the Bank's policies and international best practices. In this regard, numerous policies were introduced or updated during 2019, with particular attention paid to cyber-security and other risk management policies. This emphasis on Risk Management is not accidental as this is an area of great concern to regulators and other stakeholders in the banking industry.

2. Properties.

Provide a list of properties owned by the reporting entity, detailing the productive capacity and future prospects of the facilities. Identify properties acquired or disposed of since the beginning of the financial year for which this report is filed.

Note: The subsidiary, Property Holding SVG Ltd. disposed three lots of land being lot#2, lot#3 and lot#4 admeasuring 11,885 square feet each, totaling 35,655 square feet in June 2017. Please see below details of properties held by the BOSVG and its subsidiary.

- (v) Statement of Changes in Equity; and
- (vi) Notes to the Financial Statements.

The 2019 Financial Statements are attached.

7. Disclosure about Risk Factors.

Provide a discussion of the risk factors that may have an impact on the results from operations or on the financial conditions. Avoid generalised statements. Typical risk factors include untested products, cash flow and liquidity problems, dependence on a key supplier or customer, management inexperience, nature of business, absence of a trading market (specific to the securities of the reporting issuer), etc. Indicate if any risk factors have increased or decreased in the time interval between the previous and current filing.

As at December 31, 2019, the Bank's overall risk profile remained stable in the following categories: Credit Risk, Liquidity Risk, Market Risk, Reputational Risk, Legal and Regulatory/Compliance Risk, Earnings and Capital Adequacy. The continued volatility of corresponding banking relationships contributed to the high rating for operational risk, which remained higher than the other categories. The Bank recorded minimal operational losses and litigation costs.

During the period focus was on the following areas of operational risk:

Policy Review Exercise

The Policy Review exercise has generally been managed within the established timeline. Two suites of policies remain outstanding at December 31, 2019 – Operations and Human Resources – due to the amount of work required to complete. The new deadline for the completion of these policies is June 2020.

IT Governance Framework

The IT Governance Committee, which has oversight of governance of the IT activities of the Bank, recommended seventeen (17) IT Policies for approval. The suite of policies was developed to ensure that the IT activities of the Bank are in compliance with all relevant laws and regulatory requirements.

Cybersecurity risk

This area continues to be of concern due to constant evolution in technology. The Bank ensures that the systems and controls in place to detect and prevent unauthorized access to its network and IT systems are always functional and adequately monitored. The Bank has an arrangement with an external company to conduct 24 hour monitoring of its IT environment and provide incident reports.

There were no major security activities for the quarter ended December 31, 2019.

Business Continuity and Disaster Recovery

The Bank conducts annual testing of its IT infrastructure to determine its ability to recovery and provide service to its customers in a timely manner, in the event of a disaster. The DR testing to assess and mitigate all applicable risks was successfully completed in May 2019, ahead of the commencement of the annual hurricane season.

Compliance

There was no increase in the risk rating in this area.

There is general compliance with AML / CFT policies and procedures. Activities are generally in keeping with what is known of the bank's customers and supporting documentation is obtained as required.

The Enhanced Compliance Solutions software is utilized to monitor all transactions, including wire transfers for structuring any other AML infractions.

There were no reported breaches for the quarter ended December 31, 2019.

Legal and Regulatory

The Bank maintained compliance with the established legal and regulatory requirements.

Reporting requirements under FATCA and Common Reporting Standard (CRS) have been satisfied for 2019.

8. Changes in Securities and Use of Proceeds.

- (a) Where the rights of the holders of any class of registered securities have been materially modified, give the title of the class of securities involved. State briefly the general effect of such modification upon the rights of holders of such securities.

There were no changes to the rights of the holders of BOSVG securities.

(b) Where the use of proceeds of a security issue is different from that which is stated in the registration statement, provide the following:

- Offer opening date (provide explanation if different from date disclosed in the registration statement)

N/A

- Offer closing date (provide explanation if different from date disclosed in the registration statement)

N/A

- Name and address of underwriter(s)

N/A

- Amount of expenses incurred in connection with the offer N/A

- Net proceeds of the issue and a schedule of its use

N/A

- Payments to associated persons and the purpose for such payments

N/A

(c) Report any working capital restrictions and other limitations upon the payment of dividends.

N/A

9. Defaults upon Senior Securities.

- (a) If there has been any material default in the payment of principal, interest, a sinking or purchase fund instalment, or any other material default not satisfied within 30 days, with respect to any indebtedness of the reporting issuer or any of its significant subsidiaries exceeding 5 per cent of the total assets of the reporting issuer and its consolidated subsidiaries, identify the indebtedness. Indicate the nature of the default. In the case of default in the payment of principal, interest, or a sinking or purchase fund instalment, state the amount of the default and the total arrears on the date of filing this report.

N/A

- (b) If any material arrears in the payment of dividends have occurred or if there has been any other material delinquency not satisfied within 30 days, give the title of the class and state the amount and nature of the arrears or delinquency.

N/A

10. Management's Discussion and Analysis of Financial Condition and Results of Operation.

Discuss the reporting issuer's financial condition covering aspects such as liquidity, capital resources, changes in financial condition and results of operations during the financial year of the filing. Discussions of liquidity and capital resources may be combined whenever the two topics are interrelated.

The Management's Discussion and Analysis should disclose sufficient information to enable investors to judge:

1. The quality of earnings;
2. The likelihood that past performance is indicative of future performance; and
3. The issuer's general financial condition and outlook.

It should disclose information over and above that which is provided in the management accounts and should not be merely a description of the movements in the financial statements in narrative form or an otherwise uninformative series of technical responses. It should provide management's perspective of the company that enables investors to view the business from the vantage point of management.

General Discussion and Analysis of Financial Condition

The discussion should focus on aspects such as liquidity; capital resources; changes in financial condition; results of operations; material trends and uncertainties and measures taken or to be taken to address unfavourable trends; key performance indicators; and non-financial indicators.

During the year under review, the Bank realized a net profit of \$14.09 million, a modest increase over the \$12.92 million earned in 2018. This improved performance was largely attributed to a 38.4% increase in interest earned in investment securities, and a 19.6% increase in commission and credit related fees. Interest on loans and advances for the year was flat.

The 2019 financial year continued the trend of balance sheet growth with total assets increasing by \$125.3 million or 12.5%. Asset growth was primarily in the areas of Cash and Balances with Central Bank and Deposits with other banks, which grew by a combined amount of \$136.8 million or 60.9%. The growth in assets was funded through increase in deposits of \$143.2 million or 18.7 %

Based on the existing dividend policy and with this financial performance during the year, the Board has approved a dividend payment of \$0.47 per share. We thus started 2020 with a strong balance sheet and combined with a clear strategy on improving the brand, the Bank of St. Vincent and the Grenadines is in a good position for the future.

The economy of St. Vincent & the Grenadines is expected to be negatively impacted by emergence of the COVID 19 (CORONA VIRUS). Preliminary indications are that the Bank's interest-earning potential by way of interest income from investments and foreign exchange earnings are the categories most likely to be impacted in the short term. We have prepared a relief package for our customers which, includes a moratorium on interest and /or principal for our loan customers who are affected. In our view, the major impact of this initiative will be on the Bank's loan loss provisions, as the occurrence of the event triggers a review of the Bank's IFRS 9 model.

While the pandemic is likely to have some impact on the Bank's operation, the present liquidity and capital buffers are deemed adequate to withstand any major fallouts. The Liquid Asset to Deposit ratio at the end of 2019 Financial Year was approximately 41%. This currently exceeds the benchmarked ratio of 20-25%. There is also an approved Liquidity Contingency plan, which identifies the steps to be followed in the event of a liquidity crisis.

Further, as at December 31st the Bank's Capital Adequacy Ratio (CAR) was 24.2%, this was well above the benchmarked guideline of 8 %. As such, we are of the view that there is enough capital buffer to cushion any major fallout from impact of the pandemic on the Bank's operations

Liquidity and Capital Resources

Provide a narrative explanation of the following (but not limited to):

- i) The reporting issuer's financial condition covering aspects such as liquidity, capital resources, changes in financial condition and results of operations.
- ii) Any known trends, demands, commitments, events or uncertainties that will result in, or that are reasonably likely to result in, the issuer's liquidity increasing or decreasing in any material way. If a deficiency is identified, indicate the course of action that the reporting issuer has taken or proposes to take to remedy the deficiency.
- iii) The issuer's internal and external sources of liquidity and any material unused sources of liquid assets.
- iv) Provisions contained in financial guarantees or commitments, debt or lease agreements or other arrangements that could trigger a requirement for an early payment, additional collateral support, changes in terms, acceleration of maturity, or the creation of an additional financial obligation such as adverse changes in the issuer's financial ratios, earnings, cash flows or stock price or changes in the value of underlying, linked or indexed assets.
- v) Circumstances that could impair the issuer's ability to continue to engage in transactions that have been integral to historical operations or are financially or operationally essential or that could render that activity commercially impracticable such as the inability to maintain a specified level of earnings, earnings per share, financial ratios or collateral
- vi) Factors specific to the issuer and its markets that the issuer expects will affect its ability to raise short-term and long-term financing, guarantees of debt or other commitment to third parties, and written options on non-financial assets.
- vii) The relevant maturity grouping of assets and liabilities based on the remaining period at the balance sheet date to the contractual maturity date. Commentary should provide information about effective periods and the way the risks associated with different maturity and interest profiles are managed and controlled.
- viii) The issuer's material commitments for capital expenditures as of the end of the latest fiscal period, and indicate the general purposes of such commitments and the anticipated source of funds needed to fulfil such commitments.
- ix) Any known material trends, favorable or unfavorable, in the issuer's capital resources, including any expected material changes in the mix and relative cost of capital resources, considering changes between debt, equity and any off-balance sheet financing arrangements.

Discussion of Liquidity and Capital Resources

The Capital Adequacy Ratio remained strong at 24.2%, which was significantly above regulatory requirement of 8%. This strong capital position was driven by profits before tax of \$16.1M for the 2019 financial year. Total equity increased by \$5.5M (4.6%) from \$119.7M at September 30, 2019 to \$125.2M at the end of December 2019.

Healthy liquidity and funding positions were maintained with net liquid assets to deposit ratio of 41.6%. The Bank was able to maintain stable asset quality by preventing large-scale migration of loans into non-performing status.

Off Balance Sheet Arrangements

Provide a narrative explanation of the following (but not limited to):

- i) Disclosures concerning transactions, arrangements and other relationships with unconsolidated entities or other persons that are reasonably likely to materially affect liquidity or the availability of, or requirements for capital resources.
- ii) The extent of the issuer's reliance on off-balance sheet arrangements should be described fully and clearly where those entities provide financing, liquidity, market or credit risk support, or expose the issuer to liability that is not reflected on the face of the financial statements.
- iii) Off-balance sheet arrangements such as their business purposes and activities, their economic substance, the key terms and conditions of any commitments, the initial on-going relationship with the issuer and its affiliates and the potential risk exposures resulting from its contractual or other commitments involving the off-balance sheet arrangements.
- iv) The effects on the issuer's business and financial condition of the entity's termination if it has a finite life or it is reasonably likely that the issuer's arrangements with the entity may be discontinued in the foreseeable future.

There was no material off balance sheet arrangements at reporting period.

Results of Operations

In discussing results of operations, issuers should highlight the company's products and services, facilities and future direction. There should be a discussion of operating considerations and unusual events, which have influenced results for the reporting period. Additionally, any trends or uncertainties that might materially affect operating results in the future should be discussed.

Provide a narrative explanation of the following (but not limited to):

- i) Any unusual or infrequent events or transactions or any significant economic changes that materially affected the amount of reported income from continuing operations and, in each case, the extent to which income was so affected.
- ii) Significant components of revenues or expenses that should, in the company's judgment, be described in order to understand the issuer's results of operations.
- iii) Known trends or uncertainties that have had or that the issuer reasonably expects will have a material favorable or unfavorable impact on net sales or revenues or income from continuing operations.
- iv) Known events that will cause a material change in the relationship between costs and revenues (such as price increases, costs of labour or materials), and changes in relationships should be disclosed.
- v) The extent to which material increases in net sales or revenues are attributable to increases in prices or to increases in the volume or amount of goods or services being sold or to the introduction of new products or services.

Results of Operations

The 2019 financial year was another successful one for the Bank of St. Vincent and the Grenadines as significant progress was made in advancing the initiatives outlined in the Bank's Strategic Plan. Buoyed by an increase in total revenue of \$4.7 million, the Bank recorded a net profit \$14.1 million compared to \$12.9 million recorded for the 2018 financial year. Revenue growth was mainly manifested in both interest and non-interest income categories, with non-interest income growing by approximately \$2.9 million or 18 % over the previous financial year. The investment in technology to support the ongoing digitization of the Bank in conjunction with other volume-driven costs resulted in an increase in operating expenses of \$1.5 million during the year.

Net Interest Income

The growth in net interest income of \$1.4 million was mainly as a result of the deployment of excess liquidity and was mainly reflected in the category of Income from Investments and Bank Deposits, which grew by \$1.6 million. Consistent with the growth in savings deposits, there was an increase in interest expense of \$0.65 million or 6.1%. The Bank's cost of funds was managed in a manner that allowed the Bank to achieve its budgetary targets for the 2019 financial year.

Non-Interest Income

Over the past years, the bank introduced a number of fees to mainly offset the rising cost of risk management and digitization. The adjustments also brought the fee structure in line with the market. The revised fees have contributed significantly to the increase in non-interest off \$2.9 million.

Operating Expenses

Total operating expenses increased by \$1.5 million (4.4%) when compared to the comparative period in 2018. This increase is consistent with the initiatives in the Bank's Strategic Plan as it relates to the development of human capital, increased digitization and the re-branding of the institution. Within this context, an additional amount of \$0.16 million was spent in the training of the staff, and marketing expenses increased by \$0.40 million. Other areas of increases include interest levy of \$0.22 million and credit card expenses, with the increase in membership fees and licenses driven by additional compliance cost. Management remains committed to making concerted efforts and to be extra vigilant in managing costs in the ensuing period.

Asset Quality

Consistent with the strategic theme of enhancing financial performance, the management of the bank continued to implement a number of initiatives geared at sustaining asset quality. As such, there was a marginal increase of \$0.9 million in total non-performing loans when compared with the 2018 financial year. As at the December 31, 2019, the balance on the portfolio was \$40.6 million compared with \$39.6 million in the comparative period. The major contributing category to the overall increase was mortgages, which moved from \$15.3 million in 2018, to \$18.2 million at the end of 2019. There were also reductions of \$1.2 million and \$0.96 million in the term loans and corporate loans categories.

The non-performing loans as a percentage of total loans moved from 6.2 to 6.5 percent, while provisions for loans losses moved from \$17.0 million to \$19.8 million as at December 31, 2019. Additionally, an amount of \$1.4 million was transferred to the Bank's General Provision Reserves, increasing that Reserve to \$4.5 million. Consequently, the provisions (including the General Provisions Reserves) as a percentage of non-performing loans improved from 50.7 % in 2018 to 60.3 % in 2019.

Balance Sheet Review

Total assets increased by \$125 million or 12.5% over the 2018 financial year; this growth was mainly concentrated in the areas of Cash and Balances with Central Bank and Deposits from Banks, which grew by \$52 million or 49.2% and \$84.8 million or 71.4% respectively. The growth in assets was funded through increased deposit liabilities of \$143.1 million or 18.7%. Despite the significant growth in deposits, the Bank was able to manage its cost of funds in a manner that allowed the achievement of profitability targets.

Loans and Advances

There was a marginal decline of \$13.5 million or 2.2% in the loans and advances portfolio. This reduction was primarily in the overdraft category and resulted from reduced public sector exposure at the end of the financial year. The average loan portfolio balance maintained during the year was consistent with the performance in the comparative period as the Bank was successful in recycling principal collections. Significant internal focus was also placed on strengthening the Bank's Credit Risk Framework; this culminated with the approval of a new Credit Policy and training of staff in all critical areas of loan approval and Credit risk management.

Investments

The Bank's total investment portfolio of \$80.7 million was comparable to the previous financial year. During the 2019 financial year, a decision was taken to invest the Bank's excess liquidity funds with international Banks which offered rates comparable to those offered by the Bank's Portfolio Managers. This strategy has contributed in part to the overall improvement in net interest income.

Funding

Given the prevailing economic environment, the domestic banking sector continues to be characterized by high levels of liquidity. During the year the Bank's deposit portfolio grew by \$143 million. Total deposits as at December 31, 2019 was \$910 million compared to \$767 million in 2018. Overall growth in deposit of 18.7% was mainly in the areas of savings deposits and demand deposits which increased by \$61.3 million or 15.4% and \$78.9 million or 30.8% respectively. Despite the significant increase in deposits, the Bank was able to maintain the associated interest expense at an acceptable level.

Capital and Reserves

In light of the growth in profitability, the Bank's total Capital & Reserves grew by \$7.7 million moving from \$117.6 million at December 31, 2018 to \$125.4 million at the end of 2019. During the 2019, financial year, an amount of \$6.4 million in dividends was paid to shareholders while \$1.4 million was transferred from Retained Earnings to the General Provision Reserves. The Capital Adequacy at 26.2% remains well above the 8 % regulatory benchmarked requirement.

During the year we conducted a sensitivity analysis to assess the impact of the implementation of the Basel II/III. The results of these analyses indicate that there is significant capital buffer to withstand the implementation of the proposed requirements for capital adequacy under the new framework.

11. Changes in and Disagreements with Auditors on Accounting and Financial Disclosure.
