- (2) Main building at Corito housing all generating units and a Generation Maintenance Workshop
- (3) Building at Corito housing the Transmission and Distribution Department
- (4) Vehicle Maintenance Garage.
- (5) Stores Department warehouse
- (6) West End Substation
- (7) Corito Substation

3. Legal Proceedings:

NONE

4. Submission of Matters to a Vote of Security Holders.

No Annual General Meeting was held in 2017 due to the impact of Hurricane Irma on September 6th 2017.

5. Market for Reporting issuer's Common Equity and Related Stockholder Matters.

Anglec is not a listed company. No securities were sold during the period.

6. Financial Statements and Selected Financial Data.

Financial Statements are attached herewith.

7. Disclosure about Risk Factors.

The Company has exposure to various risks. The list of operational and financial risks that impact the Company and listed below are not an exclusive list, but identifies those that have a higher probability of occurrence or material impact. Those risks are credit risk, liquidity risk, market risk, capital management, weather/disaster and business continuity risks, insurance risks, reputational risks, sabotage, fraud, emerging technologies, etc.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Board of Directors oversees how management monitors compliance with the Company's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Company.

Consumer Group Concentration

ANGLEC's largest consumer groups are the Hotels and Government sectors which contribute approximately 35% and 17% of our sales, respectively. A significant decline revenue earnings capability in either of the two sectors can adversely impact the revenue earning stream, profitability and cash flow of ANGLEC.

Natural Disasters

The Company's Transmission and Distribution network is self-insured. Each year the Company contributes a predetermined amount to this self-insurance fund. Claims against these funds are made based upon events (natural disasters or other events) impact the network on a large scale. This exposes the Company to additional risk as the funding of this account is in its infancy. The growth and stability of Anguilla's economy is significantly affected by hurricanes and other natural disasters. Network damage from a serious hurricane can have an adverse effect on the company's earnings.

Large Consumers Inability to Pay

Short- and medium-term cessation of payments of electricity bills by either of the two large sectors above can impact severely the cash flow sustainability of the company. Delayed payment or non-payment of the Government of Anguilla and two major Hotels were a challenge during the latter part of the year.

Trade and other receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the Company's customer base, including the default risk of the industry and country, in which customers operate, has less influence on credit risk. Approximately 16 percent of the company's revenue is attributable to sales transactions with a single customer.

Liquidity risk

Liquidity risk is the risk that the company will not be able to meet its financial obligations as they fall due. The company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the company's reputation.

Typically, the company ensures that it has sufficient cash on demand to meet expected operational expenses for a period of 60 days, including the servicing of financial obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters. In addition, the company maintains a line of credit with a limit of EC\$3.2 million with the National Commercial Bank of Anguilla Limited with an interest rate of 9.2% per annum. The cash resources of the company have to be prudently managed due to the number of large cash payments needed for the operation of the business.

8. Changes in Securities and Use of Proceeds.

No shareholder rights were modified during 2017.

9. Defaults Upon Senior Securities.

There has been no default in payment of any securities, dividends nor any indebtedness or loans due by the Company.

10. Management's Discussion and Analysis of Financial Condition and Results of Operation.

Revenues and Net Income

The Statement of Comprehensive Income for the year ended 31 December, 2017 is reporting total revenues of EC\$ 51,106 Million (M) as compared with EC\$ 65,693 M in 2016, a negative variance of some EC\$ 14,587 M, or neg. 22.20 % between the two periods.

We note that the Energy sales for 2017 are being reported at EC\$ 42,359 M, as compared with the 2016 total of EC\$ 53,922 M, or negative EC\$ 11,563 M or -21.44 % over 2016. This decrease in energy sales was primarily due to decrease KWH of electricity units sold. We sold 90,999M KWHs of electricity in 2016 while selling 72,053 M KWH in 2017, a 18,946 M KWH difference or -21 % decrease 2017/2016. As a percentage of total Gross Revenues, Energy sales accounted for 82.88 % of the total revenue in 2017, whereas the ratio was 82.08 % in 2016.

We are reporting a less significant reduction under the Fuel Surcharge recovery income by some -EC\$ 102 K, or neg. 1.15 % between 2017/2016. We recovered EC\$ 8,746,726 M in fuel as compared with EC\$ 8,849,061 M in 2016.

During 2017 the fuel surcharge rate charged to customers remained at 12 cents.

As a percentage of total Gross revenues, Fuel surcharge recoveries accounted for 17.12 % in 2017, whilst 13.47 % in 2016. The difference in those rates is as a result of the reduced Revenue experienced in 2017 due to the effects of Hurricane Irma.

Net Income decreased from EC\$ 3.4 M in 2016 to EC\$ -7.3 million in 2017, a decrease of EC\$ 10.7 million. The major driver of this performance during the year was solely the effects of Hurricane Irma. There was a significant reduction during the months of September, October, and November of 2017 with slight improvements being realized as the restoration was completed and customers returned to the grid.

The Total Comprehensive Income for 2017 was EC\$ -8.12 million as compared with EC\$ 3.3 million in 2016, a negative variance, year on year, of EC\$ 11.42 million.

The difference between the Net Income figures and the Total Comprehensive Income was due to the re-measurement of the Net Pension Asset of EC\$ 819 thousand reported in 2017 and EC\$65 Thousand in 2016.

Operating Costs

Total operating cost for the year ended 2017 is being reported at EC\$ 68 million, whilst that for 2016 was EC\$ 48 million, this was a Negative difference of EC\$ 20 million or -42% 2017/2016. Total fuel cost for 2017 was EC\$ 15.5 million as compared with EC\$ 20.4 million in 2016, representing a difference year on year of EC\$ 4.9 million, or +24 %. The total fuel cost for 2017 accounted for 49 % of the total revenue generated, that for 2016 was 45 %.

Other Generation cost for 2017 was EC\$ 13 million as compare with EC\$ 10 million in 2016, an increase in cost of EC\$ 3M, or 30 %. Other Generation cost as a function of revenue was 25 % (2016-15 %).

Fuel Cost

Fuel cost is the single major cost incurred by the company. It accounted for 50.8 % as a function of our revenues. In 2016 it accounted for 45 %. We noted during the year under review that the average cost per imperial gallon (IG) of gasoil fuel was EC\$ 6.08, by way of comparison it was EC\$ 5.25 in 2016, this represents an increase of EC\$.83 per IG or 16 % between the two years. Further, we consumed 4.2 million IG of fuel in 2017, as compared with 5.4 million IG in 2016, a positive variance of 0.2M IG, or 3.7% 2017/2016.

Because of the Increase in fuel during 2017 we were unable to pass on any savings to our customer, by way of reductions in the fuel surcharge rates. The fuel surcharge remained at EC\$0.12 per Kwh throughout 2017.

Other Generation

Other Generation cost, i.e. Generation cost excluding fuel, was reported at EC\$ 12.7 million in 2017 as compared with EC\$ 10.4 million in 2016, a negative variance of EC\$ 2.3M, or -22 %. This increase in Generation cost is primarily due to increases in the repairs and maintenance of the generation equipment.

Transmission and Distribution

We reported total Transmission and Distribution cost of EC\$ 9.2 million in 2017 as compared with EC\$ 8.8 million in 2016, an increase in cost, or negative variance, to the company of EC\$ 400 thousand or 4.55 %, year on year.

Operating Expenses

Total Operating Expenses, comprised of Administrative Expenses and Customer Services, was reported at EC\$ 12.4 million in 2017 as compared with EC\$ 15.4 million in 2016, a positive variance of EC\$ 3.0 million, or 19.5 % between the two years.

Finance Cost

Finance cost Increased between 2017 and 2016 by EC\$ 97 thousand, or 18%, from 2017-EC\$ 625 thousand to 2016-EC\$ 528 thousand.

Capital Expenditures

The need to continue investing to improve the efficiency of our operations, particularly in the Generation, Transmission and Distribution areas are of the highest importance. This year capital expenditures of EC\$ 24.167 million were expended as follows:

Building	EC\$0.073million
Plant and Machinery	EC\$20.00 million
Furniture, Fixtures and Equipment	EC\$ 0.137million
Vehicles	EC\$1.30 million
Work in Progress	EC\$ 1.00 million

	EC\$ 22.51 million
	=====

Most if not all of these acquisitions were in fact necessary because of the passage of Hurricane Irma which decimated our Fixed Assets. As a result, we also experienced some EC\$14.7 Million in written off Fixed Assets during 2017.

Earnings per Share+ Dividends

Earnings per share decreased from EC\$ 0.29 in 2016 to EC\$- 0.63 in 2017.

11. **Changes in and Disagreements with Auditors on Accounting and Financial Disclosure.**
12. **Directors and Executive Officers of the Reporting Issuer.**

EXECUTIVE OFFICERS
