INDEPENDENT AUDITOR'S REPORT

To the Shareholders of East Caribbean Financial Holding Company Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the consolidated financial statements of East Caribbean Financial Holding Company Limited and its subsidiary (collectively, "the Group"), which comprise the consolidated statement of financial position as at 31 December 2019 and the consolidated statements of profit or loss and comprehensive income, changes in equity and cash flows for the year then ended, and notes, to the consolidated financial statements including a summary of significant accounting policy.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2019, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRs).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the International Ethic Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Eastern Caribbean, and we have fulfilled out other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

To the Shareholders of East Caribbean Financial Holding Company Limited

Key Audit Matters, continued

Key Audit Matter

How the matter was addressed in our audit

IFRS 9 Expected Credit Losses

Refer to Notes 2, 11 and 12 of the consolidated financial statements

IFRS 9, Financial Instruments, was implemented by the Group on January 1, 2018. The standard, which replaced IAS 39 Financial Instruments: Recognition and Measurement is new and complex and requires the Group to 2 expected credit losses ('ECL') on financial assets, the determination of which is highly subjective and requires management to make significant judgement and estimates.

The key areas requiring a greater level of judgement by management and therefore increased audit focus include the identification of significant increase in credit risk ('SICR') and the application of forward-looking information.

The identification of significant increase in credit risk is a key area of judgement as these criteria determine whether a 12 month or lifetime provision is recorded (i.e. the Stage allocation process). IFRS 9 requires the Group to measure expected credit losses on a forward-looking basis reflecting a range of future economic conditions.

Significant management judgement is used in determining the economic scenarios and management overlay.

General

We understood management's process and reviewed key activities around the determination of expected credit loss allowances including:

- Appropriateness of modeling methodology;
- Model approval;
- The identification of credit impairment events; and
- The review, challenge and approval of the expected credit loss allowances, including the impairment model outputs, key management judgments and overlays applied.

Stage 1 and Stage 2 Loans and advances

- Obtained an understanding of the impairment model used by management for the calculation of expected credit losses.
- Tested the completeness and accuracy of the key data inputs used in the model to the underlying accounting records.

Key	Audit	Matter	

How the matter was addressed in our audit

IFRS 9 Expected Credit Losses (cont'd)

To the Shareholders of East Caribbean Financial Holding Company Limited

Key Audit Matters, continued

For the Group's loans and advances in Stage 1 and 2 (i.e. Stage 1 - loans which had not experienced a significant increase in credit risk since origination and; Stage 2 - those that had experienced such), the allowance is determined on a collective basis with the use of impairment models. These models use a number of key assumptions including probability of default, loss given default and valuation of recoveries. Management also apply overlays where they believe the model calculated assumptions and allowances require refinement due to historical trends or due to the model limitations.

For the Group's loans and advances in Stage 3 (i.e. credit impaired facilities) expected credit losses are estimated on an individual basis. Specific criteria has been developed to identify loans that have become credit impaired. However judgement is exercised to determine whether any additional loans are exhibiting specific characteristics that would lead to such classification. The Group then estimates the expected future cash flows related to those loans.

We therefore determined that the impairment of loans and advances has a high degree of estimation uncertainty.

Involved our actuarial specialists to evaluate the reasonableness of the Group's ECL estimates based on the underlying ECL models produced by the Group. As part of this, the specialists reviewed the methodologies assumptions employed within the models for reasonableness. This included a review of the SICR criteria used, the derivation and assumptions selected for probability of default, loss given default and the exposure at default. Additionally the considered specialists the appropriateness of using a management's overlay approach in lieu of a regression model based on the statistical credibility results provided.

Stage 3 Loans and advances

- We critically assessed the criteria for determining whether a credit impairment event had occurred. This involved reviewing a sample of loan facilities in Stage 1 and 2 for indicators of a credit impairment event based on determined risk characteristics.
- We assessed the adequacy of the impairment allowance for loans and advances by testing the key assumptions used in the Group's ECL calculations including forecasts of future cash flows and timing of such.

To the Shareholders of East Caribbean Financial Holding Company Limited

Key Audit Matters, continued

Key Audit Matter	How the matter was addressed in our audit		
IFRS 9 Expected Credit Losses (cont'd)		
	We involved our internal valuation specialists in the review of third party valuations of the underlying collateral security supporting a sample of loans and advances.		
	We also considered the current market conditions and compared these against the Group's historical experience of the realization of security and actual collection of cash flows. Reperfermed management's allowance.		
	Re-performed management's allowance calculation.

Key Audit Matters, continued

Key Audit Matter

How the matter was addressed in our audit

Valuation of financial instruments held at fair value

Refer to Notes 2, 3 and 14 of the consolidated financial statements

The Group invests in various investment securities for which no published prices in active markets are available. These have been classified as Level 2 assets within the IFRS fair value hierarchy.

Valuation techniques for these financial instruments can therefore be subjective in nature. Fair value is determined through the application of valuation techniques which often involve the exercise of judgment by management and the use of assumptions, estimates and valuation models.

For Level 2 assets, valuation techniques include the use of recent arm's length transactions, reference to other instruments that are substantially the same and discounted cash flow analyses making maximum use of market inputs, such as market risk free yield curve.

With the support of our valuation specialists, we performed the following tests:

- Challenged the appropriateness of assumptions and valuation methodologies used in calculating fair values and testing their application.
- Independently assessed the fair value of the investments by developing an independent model.
- Compared the valuation provided by the Group to those calculated using our model.

We also reviewed and verified that the financial statement disclosures were appropriate and included the required IFRS 13 fair value measurement disclosures which are key to explaining the valuation techniques, key judgments, assumptions and material inputs.

Other Information

Management is responsible for the other information. The other information comprises the Group's 2019 Annual Report, but does not include the consolidated financial statements and our auditors' report thereon. The Annual Report is expected to be made available to us after the date of this auditors' report.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Group's 2019 Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

To the Shareholders of East Caribbean Financial Holding Company Limited

Key Audit Matters, continued

INDEPENDENT AUDITOR'S REPORT, continued

To the Shareholders of East Caribbean Financial Holding Company Limited

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements, continued

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing
 an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

To the Shareholders of East Caribbean Financial Holding Company Limited

Key Audit Matters, continued

INDEPENDENT AUDITOR'S REPORT, continued

To the Shareholders of East Caribbean Financial Holding Company Limited

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements, continued

Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern

 Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

To the Shareholders of East Caribbean Financial Holding Company Limited

Key Audit Matters, continued

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Baldwin Alcindor.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

1 General information

In October 2016 the East Caribbean Financial Holding Company Limited (ECFH) was amalgamated with Bank of Saint Lucia Limited and ECFH Global Investment Solutions in accordance with the provisions of the Companies Act CAP 13.01, Revised Laws of Saint Lucia and continued as Bank of Saint Lucia Limited. Another company with the same name East Caribbean Financial Holding Company Limited was then reincorporated under the same act to hold the shares of Bank of Saint Lucia Limited, Bank of Saint Lucia International Limited and Bank of St. Vincent & the Grenadines.

Bank of Saint Lucia Limited, and ECFH are in compliance with the Companies Acts and Banking Acts and the provisions of the Insurance Act, 1995.

The principal activity of the Company and its subsidiaries (the "Group") is the provision of financial services. The registered office and principal place of business of the Company is located at No.1 Bridge Street, Castries, Saint Lucia.

The principal shareholding of the Group is stated in Note 43.

The Company is listed on the Eastern Caribbean Securities Exchange.

2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Statement of compliance

East Caribbean Financial Holding Company Limited's consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) as at 31 December 2019 (the reporting date).

Basis of preparation

The consolidated financial statements have been prepared under the historical cost convention, except for the following material items that are measured at fair value in the consolidated statement of financial position.

- Financial assets measured at fair value through profit or loss
- Financial assets designated at fair value through profit or loss
- Equity instruments designated at fair value through other comprehensive income
- Debt instruments measured at fair value through other comprehensive income

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 4.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

Basis of preparation... continued

(a) Changes in accounting policies and disclosures

The Group applied for the first time certain standards and amendments, which are effective for annual reporting periods beginning on or after 1 January 2019. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Of these new standards and amendments applied for the first time in 2019, only IFRS 16 had a material impact on the annual financial statements of the Group. The nature and the impact of each new standard or amendment is described below:

• IFRS 16 Leases

In January 2016, the IASB issued IFRS 16 Leases, the standard that replaced IAS 17 for annual reporting periods beginning on or after 1 January 2019, with early adoption permitted. The bank did not early adopt IFRS 16. IFRS 16 specifies how leases will be recognised, measured, presented and disclosed. IFRS 16 does not significantly change the accounting for leases for Lessors. However; the standard does require lessees to recognise most leases on their balance sheet as lease liabilities with the corresponding right-of-use assets. Lessees must apply a single model for all recognised leases, but will have the option not to recognise "short-term" leases and leases of "low-value" assets. Generally, the profit or loss recognition pattern for recognised leases will be similar to finance lease accounting under the predecessor standard IAS 17, with interest and depreciation expense recognised separately in the statement of income. The impact of IFRS 16 is disclosed in note 19

• Amendments to IAS 12 Income Taxes – Annual Improvements to IFRS Standards 2015-2017

The IASB issued an amendment to IAS 12 in December 2017. The amendment clarified the recognition and measurement of current and deferred taxes on dividends. The amendment clarified the recognition of income tax consequences of dividends where the transactions or events that generated distributable profits are recognised, apply to all income tax consequences of dividends. This amendment is effective for annual reporting periods beginning on or after January 1, 2019 and did not have a significant impact on the Group.

• Amendments to IAS 19 Employee Benefits

In February 2018, through issuing amendments to IAS 19, the IASB made changes relating to defined benefit plan to include Plan Amendment, Curtailment and Settlement as follows:

- I. If a plan amendment, curtailment or settlement occurs, it is now mandatory that the current service cost and the net interest for the period after the re-measurement are determined using the assumptions used for the re-measurement
- II. In addition, amendments have been included to clarify the effect of a plan amendment, curtailment or settlement on the requirements regarding the asset ceiling.

The amendments to standard are applicable to plan amendments, curtailments or settlements occurring on or after the beginning of the first annual reporting period that begins on or after January 1, 2019 with early adoption permitted.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

Basis of preparation... continued

- (a) Changes in accounting policies and disclosures.... continued
 - Amendments to IAS 23 Borrowing Costs Annual Improvements to IFRS Standards 2015-2017

The amendment to IAS 23 clarified that when a qualifying asset is ready for its intended use or sale, any outstanding borrowings made specifically to obtain that qualifying asset, becomes part of general borrowings. It therefore means that an organization should calculate the capitalization rate on general borrowings taking into account the specific borrowing on completed assets if outstanding.

The amendment was issued in December 2017 and is applicable for annual reporting periods beginning on or after January 1, 2019.

• Amendments to IAS 28 Investments in Associates and Joint Ventures

The IASB published Long-Term Interests in Associates and Joint Ventures (Amendments to IAS 28) to clarify that an entity applies IFRS 9 including its impairment requirements, to long-term interests in associates or joint ventures that form part of the net investment in the associate or joint venture but to which the equity method is applied.

The amendments are effective for reporting periods beginning on or after January 1, 2019, however, earlier application is permitted.

Amendments to IFRS 9 – Financial Instruments

• The IASB issued "Prepayment Features with Negative Compensation (Amendments to IFRS 9)" to address the concerns about how IFRS 9 – Financial Instruments classifies particular prepayable financial assets. Under the current standard, financial assets are classified as at amortized cost only when the business model test and the contractual cash flow characteristics (SPPI) test are met. However, when financial institutions generate loans with prepayment features with negative compensation, the cash flows from such loans might not represent solely payments of principal and interest and as such, the contractual cash flow test is not met. As a result, all the loans with similar prepayment features could not be classified at amortized cost. Prepayment Features with Negative Compensation amends the existing requirements in IFRS 9 regarding termination rights in order to allow measurement at amortised cost (or, depending on the business model, at fair value through other comprehensive income) even in the case of negative compensation payments.

Besides changes related to classification of financial assets with prepayment options, this amendment also clarified accounting for modification or exchange of financial liabilities measured at amortised cost that does not result in derecognition of the financial liability. The adjustment arising from a modification or exchange should be recognised in profit or loss at the date of the modification or exchange.

The amendments are applicable for reporting periods beginning on or after January 1, 2019 with early adoption permitted. The changes in the standard have not had a material impact on the financial statements.

Notes to the Consolidated Financial Statements

2 Summary of significant accounting policies... continued

Basis of preparation... continued

- (a) Changes in accounting policies and disclosures...continued
 - IFRS 3 Business Combinations Annual Improvements to IFRS standards 2015 2017
 The amendments to IFRS 3 clarified that when an entity obtains control of a business that is a joint operation, it remeasures previously held interests in that business.
 - IFRS 11 Joint Arrangements (Annual Improvements to IFRS Standards 2015-2017 cycle)
 The amendments to IFRS 11 clarified that when an entity obtains control of a business that is a joint operation, the entity does not remeasure previously held interests in that business.

The amendments are effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2020 and to asset acquisitions that occur on or after the beginning of that period. Earlier adoption is permitted.

• IFRIC Interpretation 23

IFRIC 23 clarifies the accounting for uncertainties in income taxes. IFRIC 23 applies to all aspects of income tax accounting where there is an uncertainty regarding the treatment of an item under IAS 12, including taxable profit or loss, the tax bases of assets and liabilities, unused tax losses and credits and tax rates.

<u>Determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates</u>

- A company has to consider whether it is probable that the relevant authority will accept each tax treatment, or group of tax treatments, that it used or plans to use in its income tax filing. If the entity concludes that it is probable that a particular tax treatment is accepted, the entity has to determine taxable profit (tax loss), tax bases, unused tax losses, unused tax credits or tax rates consistently with the tax treatment included in its income tax filings.
- If the entity concludes that it is not probable that a particular tax treatment is accepted, the entity has to use the most likely amount or the expected value of the tax treatment when determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates. The decision should be based on which method provides better predictions of the resolution of the uncertainty.

IFRIC 23 is effective for annual reporting periods beginning on or after 1 January 2019. Earlier application is permitted.

Transition

The requirements are applied by recognising the cumulative effect of initially applying them in retained earnings, or in other appropriate components of equity, at the start of the reporting period in which an entity first applies them, without adjusting comparative information. Full retrospective application is permitted, if an entity can do so without using hindsight.

2 Summary of significant accounting policies... continued

Basis of preparation... continued

(b) Standards issued but not yet effective

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's financial statements are disclosed below. The Group intends to adopt these standards, if applicable, when they become effective.

IFRS 17- Insurance Contracts

IFRS 17 Insurance Contracts establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts. An entity shall apply IFRS 17 to:

- Insurance contracts including reinsurance contracts, it issues;
- Reinsurance contracts it holds: and
- Investment contracts with discretionary participation features it issues, provided the entity also issues insurance contracts.

The standard is effective for reporting periods beginning on or after January 1, 2021. The standard is not expected to have a material impact on the financial statements of the Group.

IFRS 3 Definition of A Business (Amendments to IFRS 3)

The amendments to the definition of a Business aims at resolving the difficulties that arise when an entity determines whether it has acquired a business or a group of assets.

The amendments are changes to Appendix A defined terms, the application guidance and the illustrative examples of IFRS 3 only and include:

- Clarify that to be considered a business, an acquired set of activities and assets must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs;
- Narrow the definitions of a business and of outputs by focusing on goods and services provided to customers and by removing the reference to an ability to reduce costs;
- Add guidance and illustrative examples to help entities assess whether a substantive process has been acquired;
- Remove the assessment of whether market participants are capable of replacing any missing inputs or processes and continuing to produce outputs; and
- Add an optional concentration test that permits a simplified assessment of whether an acquired set of activities and assets is not a business.

The amendments are effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after 1 January 2020 and to asset acquisition that occur on or after the beginning of that period. Earlier adoption is permitted.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

Basis of preparation... continued

(c) Consolidation

The financial statements of the subsidiaries used to prepare the consolidated financial statements were prepared as of the Parent Company's reporting date. The consolidation principles are unchanged as against the previous year.

The consolidated financial statements of the Group comprise the financial statements of the parent entity and all subsidiaries as of 31 December 2019.

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns
- When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:
- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in profit or loss from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(c) Consolidation...continued

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognises the assets and liabilities of the subsidiary
- Derecognises the carrying amount of any non-controlling interest
- Derecognises the cumulative translation differences recorded in equity
- Recognises the fair value of the consideration received
- Recognises the fair value of any investment retained
- Recognises any surplus or deficit in profit or loss
- Reclassifies the parent's share of components previously recognised in other comprehensive income to profit or loss or retained earnings, as appropriate.

The results of the subsidiaries acquired or disposed of during the year are included in profit or loss from the effective acquisition date or up to the effective date on which control ceases, as appropriate.

The Group uses the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the group's share of the identifiable net assets acquired is recorded as goodwill. If this is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in profit or loss.

Inter-company transactions, balances and unrealised gains on transactions between group companies have been eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred.

The integration of the subsidiaries into the consolidated financial statements is based on consistent accounting methods.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(c) Consolidation... continued

Transactions with non-controlling interests and associates

The Group treats transactions with non-controlling interests as transactions with equity owners of the group. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity. Any losses applicable to the non-controlling interest are allocated against the interests of the non-controlling interest even if this results in a deficit balance. Non-controlling interests are presented separately within equity in the consolidated statement of financial position.

When the Group ceases to have control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss where appropriate.

Associates

Associates are entities over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies. Investment in associates is accounted for by the equity method of accounting and initially recognised at cost.

After application of the equity method, the Group determines whether it is necessary to recognize an impairment loss on its investment in its associate. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value, then recognizes the loss as 'Share of profit of an associate' in profit or loss.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(b) Consolidation...continued

Associates ... continued

Upon loss of significant influence over the associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognized in profit or loss. The Group's share of its associate's post-acquisition profits or losses is recognised in the consolidated statement of profit or loss and other comprehensive income, and its share of post-acquisition movements in reserves recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associate. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

(d) Fair value measurement

The Group measures financial instruments such as investment securities and non-financial asset such as investment properties, at fair value at each reporting date. Fair value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed, are summarised in the following notes:

Disclosures for valuation methods, significant estimates and assumptions Quantitative disclosures of fair value measurement hierarchy Investment properties Financial instruments (including those carried at amortised cost) Land and buildings	Notes 2,3,14 and18 Note 3 Note 18 Note 9, 14 Note 17
Land and buildings	Note 17

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability or in the absence of a principal market, in the most advantageous market for the asset or liability.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(d) Fair value measurement... continued

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value of a non-financial asset takes into account a market participants ability to generate economic benefits by using the assets in its highest and best use or by selling to another participant that would use the asset in its highest and best use.

The Group determines the policies and procedures for both recurring and non-recurring fair value measurement.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

(e) Cash and cash equivalents

For the purposes of the statement of cash flows, cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition including: cash and non-restricted balances with the Central Bank, treasury bills, deposits with other banks, deposits with a non-bank financial institutions and other short-term securities.

(f) Financial assets

The Group allocates financial assets to the following IFRS 9 categories:

- Amortised cost
- Fair value through other comprehensive income (FVOCI)
- Fair value through profit or loss (FVTPL)

IFRS 9 classification is generally based on the business model in which a financial asset is managed and its contractual cash flows.

On initial recognition, financial assets are classified by the Group as follows:

Debt instrument

Debt instruments, including loans and debt securities, are classified into one of the following measurement categories:

- Amortised cost;
- Fair value through other comprehensive income (FVOCI);
- Fair value through profit or loss (FVTPL).

Investments in debt instruments are measured at amortised cost if it meets both of the following conditions and is not designated as FVTPL:

- The asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the outstanding principal balance.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(f) Financial assets...continued

Business model assessment

Business model assessment involves determining how financial assets are managed in order to generate cash flows. The Group's business model assessment is based on the following categories:

- Held to collect: The objective of the business model is to hold assets and collect contractual cash flows. Any sales of the asset are incidental to the objective of the model.
- Held to collect and for sale: Both collecting contractual cash flows and sales are integral to achieving the objectives of the business model.
- Other business model: The business model is neither held-to-collect nor held-to-collect and for sale. The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objectives. The model is not assessed on an instrument-by-instrument basis, but rather at a portfolio level and based on factors such as:
- How the performance of the financial assets held within that business model are evaluated and reported to the Group's management personnel
- The risks that affect the performance of the assets held within a business model (and, in particular, the way those risks are managed
- How compensation is determined for the Group's business lines' management that manages the
 assets managers of the Group are compensated (for example, whether the compensation is based
 on the fair value of the assets managed or on the contractual cash flows collected)
- The expected frequency, value and timing of sales activity
- The stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching duration of the financial assets to the duration of the financial liabilities that are funding those assets or realising cash flows through the sale of assets.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or stress case scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(f) Financial assets...continued

Assessment of contractual cash flows

As a second step of its classification process the Group assesses the contractual terms of financial assets to identify whether they meet the solely payments of principal and interest (SPPI) test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount). Interest is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs as well as profit margin.

Debt instruments measured at amortised cost

Debt instruments are measured at amortised cost if they are held within a business model whose objective is to hold for collection of contractual cash flows where those cash flows represent solely payments of principal and interest. After initial measurement, debt instruments in this category are carried at amortised cost. Interest income on these instruments is recognised in interest income using the effective interest rate method. The effective interest rate is the rate that discounts estimated future cash payments or receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. Amortised cost is calculated by taking into account any discount or premium on acquisition, transaction costs and fees that are an integral part of the effective interest rate.

Impairment on debt instruments measured at amortised cost is calculated using the expected credit loss approach. Loans and debt securities measured at amortised cost are presented net of the allowance for credit losses (ACL) in the consolidated statement of financial position.

Debt instruments measured at Fair Value through Other Comprehensive Income

Investments in debt instruments are measured at fair value through other comprehensive income where they meet the following two conditions and they have not been designated at FVTPL:

- Contractual terms that give rise to cash flows on specified dates, that represent solely payments of principal and interest on the principal amount outstanding; and
- Are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.

These debt instruments are initially recognised at fair value plus directly attributable transaction costs and subsequently measured at fair value. Gains and losses arising from changes in fair value are included in other comprehensive income within a separate component of equity. Impairment losses or reversals, interest revenue and foreign exchange gains and losses are recognised in profit and loss. Upon disposal, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(f) Financial assets...continued

Debt instruments measured at Fair value through Other Comprehensive Income... *continued* Impairment on debt instruments measured at FVOCI is calculated using the expected credit loss (ECL) approach. The ECL on debt instruments measured at FVOCI does not reduce the carrying amount of the asset in the Consolidated Statement of Financial Position, which remains at its fair value.

Debt instruments measured at Fair value through profit or loss

Debt instruments are measured at FVTPL if assets:

- i) Are held for trading purposes;
- ii) Are held as part of a portfolio managed on a fair value basis; or
- iii) Whose cash flows do not represent payments that are solely payments of principal and interest

These instruments are measured at fair value in the consolidated statement of financial position, with transaction costs recognized immediately in profit or loss. Realized and unrealized gains and losses are recognized in profit or loss.

Equity instruments

Equity instruments are classified into one of the following measurement categories:

- Fair value through profit or loss (FVTPL); or
- Elected at fair value through other comprehensive income (FVOCI).

Equity instruments measured at Fair value through profit or loss

Equity instruments are measured at FVTPL, unless an election is made to designate them at FVOCI upon purchase, with transaction costs recognised immediately in profit or loss. Subsequent to initial recognition the changes in fair value are recognised in profit or loss. Equity instruments at FVTPL are primarily assets held for trading. The Group also holds a portfolio of equity instruments that are not held for trading but the performance is required to be assessed annually for distribution to the account holders. These assets though not held for trading are measured as FVTPL.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(f) Financial assets...continued

Equity instruments measured at FVOCI (designated)

At initial recognition, there is an irrevocable option for the Group to classify non-trading equity instruments at FVOCI. This election is used for certain equity investments for strategic or longer term investment purposes. This election is made on an instrument-by-instrument basis and is not available to equity instruments that are held for trading purposes.

Gains and losses on these instruments including when derecognised/sold are recorded in OCI and are not subsequently reclassified to profit or loss. As such, there is no specific impairment requirement. Dividends received are recorded in profit or loss. Any transaction costs incurred upon purchase of the security are added to the cost basis of the security and are not reclassified to profit or loss on sale of the security.

Recognition/derecognition

A financial asset is recognised in the consolidated statement of financial position when the Group becomes a party to the contractual provisions of the instrument, which is generally on trade date. Loans and receivables are recognised when cash is advanced (or settled) to the borrowers.

Financial assets at fair value through profit or loss are recognised initially at fair value. All other financial assets are recognised initially at fair value plus directly attributable transaction costs.

The Group derecognises a financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when the contractual cash flows from the asset expire or it transfers its rights to receive contractual cash flows from the financial asset in a transaction in which substantially all the risks and rewards of ownership are transferred. Any interest in transferred financial assets that is created or retained by the Group is recognised as a separate asset or liability.

Financial liabilities

The Group classifies its financial liabilities, other than financial guarantees and loan commitments as measured at amortised cost.

Impairment of financial assets

Scope

IFRS 9 has fundamentally changed the Group's impairment model by replacing IAS 39's incurred loss approach with a forward-looking three-stage expected credit loss (ECL) approach. As of January 1, 2018, the Group has recorded the allowance for expected credit losses for the following categories of financial assets:

- Amortised cost financial assets
- Debt instruments measured at fair value through other comprehensive income;
- Off-balance sheet loan commitments; and
- Financial guarantee contracts.

Equity instruments are not subject to impairment under IFRS 9.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(f) Financial assets...continued

Impairment of financial assets... continued

Expected credit loss impairment model

The three-stage ECL allowance model is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase or deterioration in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL). The 12mECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Both LTECLs and 12mECLs are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments.

The three stage approach applied by the Group is as follows:

Stage 1: 12-months ECL

The Group collectively assesses ECLs on exposures where there has not been a significant increase in credit risk since initial recognition and that were not credit impaired upon origination. For these exposures, the Group recognises as a collective provision the portion of the lifetime ECL associated with the probability of default events occurring within the next 12 months. Stage 1 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2.

Stage 2: Lifetime ECL – not credit impaired

The Group collectively assesses ECLs on exposures where there has been a significant increase in credit risk since initial recognition but are not credit impaired. For these exposures, the Group recognises as a collective provision a lifetime ECL (i.e. reflecting the remaining lifetime of the financial asset).

Stage 3: Lifetime ECL – credit impaired

The Group identifies, both collectively and individually, ECLs on those exposures that are assessed as credit impaired based on whether one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred. For exposures that have become credit impaired, a lifetime ECL is recognised and interest revenue is calculated by applying the effective interest rate to the amortised cost (net of provision) rather than the gross carrying amount. If the asset is no longer credit impaired, then the calculation of the interest income reverts to the gross basis.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(f) Financial assets...continued

Impairment of financial assets...continued

Measurement of expected credit losses (ECL)

ECLs are derived from unbiased and probability-weighted estimates of expected loss, and are measured as follows:

- Financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls over the expected life of the financial asset discounted by the effective interest rate. The cash shortfall is the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive.
- Financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows discounted by the effective interest rate.
- Undrawn loan commitments the Group estimates the expected portion of the loan commitment that will be drawn down over its expected life and calculates the ECL as the present value of the difference between the contractual cash flows that are due to the Group if the commitment is drawn down and the cash flows that the Group expects to receive.
- Financial guarantee contracts as the expected payments to reimburse the holder less any amounts the Group expects to recover.

The inputs used to estimate the expected credit losses are as follows:

- PD The probability of default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the remaining estimated life, if the facility has not been previously derecognized and is still in the portfolio.
- EAD The exposure at default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments
- LGD The loss given default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD.

Forward looking information

The standard requires the incorporation of forward looking information in the estimation of expected credit losses for each stage and the assessment of significant increases in credit risk. It considers information about past events and current conditions as well as reasonable and supportable forecasts of future events and economic conditions. The estimation and application of forward looking information requires significant judgement.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(f) Financial assets...continued

Impairment of financial assets...continued

Macroeconomic factors

The standard also requires incorporation of macroeconomic factors in models for ECLs. In its models, the Group conducted an assessment of a broad range of forward-looking economic information as possible inputs, such as: GDP growth, unemployment rates, and central-Group interest rates. The results of the assessment however failed to reveal meaningful relationships between the Group's historical loss and the economic inputs and as such economic inputs were not utilised in the models used for calculating ECLs.

The standard recognises that the inputs and models used for calculating expected credit losses may not always capture all characteristics of the market at the date of the consolidated financial statements. To reflect this, qualitative adjustments or overlays may be made as temporary adjustments using expert credit judgment. The Group therefore in an effort to make adjustments for management overlays, adjusted the stage two loans for the likelihood of migration to stage three and the severity or the extent of the provisions required when these loans migrate to stage three.

Significant increase in credit risk

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Group considers both quantitative and qualitative information and analysis based on the Group's historical experience and credit risk assessment. The Group considers as a backstop that significant increases in credit risk occurs when an asset is more than 30 days past due.

An exposure will migrate through the ECL stages as asset quality deteriorates. If, in a subsequent period, asset quality improves and also reverses any previously assessed significant increase in credit risk since origination, then the provision for doubtful debts reverts from lifetime ECL to 12-months.

Expected life

Instruments in Stage 2 or Stage 3, loss allowances reflect expected credit losses over the expected remaining lifetime of the instrument. For most instruments, the expected life is limited to the remaining contractual life. For certain revolving facilities such as credit cards and overdrafts, the expected life is estimated based on the period over which the Group's exposure to credit losses is not mitigated by our normal credit risk management actions.

Notes to the Consolidated Financial Statements

2 Summary of significant accounting policies... continued

(f) Financial assets...continued

Impairment of financial assets...continued

Presentation of allowance for ECL

Loss allowances for ECL are presented in the consolidated statement of financial position as follows:

- Financial assets measured at amortised cost: as a deduction from the gross carrying amount of the assets;
- Undrawn loan commitments and financial guarantees generally as a provisions in other liabilities,
- Debt instruments measured at fair value through OCI the ECLs are not recognized in the
 consolidated statement of financial position because the carrying amounts of these assets remain
 their fair values. However, the loss allowance is disclosed and is recognised in the fair value reserve
 in equity with a corresponding charge to profit or loss. The accumulated loss recognised in OCI is
 recycled to profit or loss upon derecognition of the assets.

Modified financial assets

During the normal course of business, financial assets may be restructured or modified or an existing financial asset replaced with a new one. When this occurs for reasons other than those which could be considered indicators of impairment, the Group assesses whether the restructured or renegotiated financial asset is significantly different from the original one by comparing the present value of the restructured cash flows discounted at the original instruments interest rate. If the restructured terms are significantly different, the Group derecognises the original financial asset and recognises a new one at fair value with any difference recognised in profit or loss.

If the cash flows of the modified asset are not substantially different, the modification does not result in derecognition of the financial asset. The Group recalculates the gross carrying amount of the financial asset and recognises the amount arising from adjusting the gross carrying value as a modification gain or loss in profit or loss.

In assessing whether the modified terms are "substantially" different from the original terms, the following factors are considered:

- Introduction of significant new terms
- Significant change in loan's interest rate
- Significant extension in loan's term
- Significant change in credit risk from inclusion of collateral or other credit enhancements

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

2 Summary of significant accounting policies... continued

(f) Financial assets...continued

Impairment of financial assets...continued

Definition of default

The Group considers a financial instrument to be in default as a result of one or more loss events that occurred after the date of initial recognition of the instrument and the loss event has a negative impact on the estimated future cash flows of the instrument that can be reliably estimated. This includes events that indicate:

- significant financial difficulty of the borrower;
- default or delinquency in interest or principal payments;
- high probability of the borrower entering a phase of bankruptcy or a financial reorganisation;
- measurable decrease in the estimated future cash flows from the loan or the underlying assets that secure the loan.
- The restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise

The Group considers that default has occurred and classifies the financial asset as credit impaired when it is more than 90 days past due,

Write-offs

The write-off of a financial asset is a derecognition event. Loans and the related impairment losses are written off, either partially or in full, when there is no realistic prospect of recovery. Where loans are secured, they are generally written off after receipt of any proceeds from the realization of collateral. In circumstances where the net realizable value of any collateral has been determined and there is no reasonable expectation of further recovery, write-off maybe earlier.

(g) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position when, and only when, there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(h) Sale and repurchase agreements

Securities sold subject to linked repurchase agreements (repos) are retained in the consolidated financial statements as investments securities and the counterparty liability is included in other borrowed funds. The difference between sale and repurchase price is treated as interest and accrued over the life of the repurchase agreement using the effective interest method.

(i) Property and equipment

Land and buildings comprises mainly branches and offices occupied by the parent or its subsidiaries. Land and buildings are shown at fair value less subsequent depreciation for buildings. Valuations are reviewed annually by quantity surveyors.

Subsequent expenditures are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of land and buildings are credited to other comprehensive income. Decreases that offset previous increases of the same asset are charged against other comprehensive income, all other decreases are charged to profit or loss.

Land is not depreciated. Depreciation on other assets is calculated on the straight-line method to allocate their cost to their residual values over their estimated useful lives as follows:

Buildings	2%
Leasehold improvements	$2 - 33 \ 1/3\%$
Motor vehicles	20 - 25%
Office furniture & equipment	10 - 20%
Computer equipment	33 1/3%

The assets' residual values and useful lives are reviewed, and adjusted if appropriate at each reporting date. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset's fair value less cost to sell and value in use.

Gains and losses on disposal are determined by comparing proceeds with the carrying amount and are included in profit or loss.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(j) Investment properties

Properties that are held for long-term rental yields or for capital appreciation or both, and that are not occupied by the entities in the consolidated group, are classified as investment properties. Investment property comprises freehold land and building which are leased out under operating leases. Some properties may be partially occupied by the Group, with the remainder being held for rental income or capital appreciation. If that part of the property occupied by the Group can be sold separately, the Group accounts for the portions separately. The portion that is owner-occupied is accounted for under IAS 16, and the portion that is held for rental income or capital appreciation or both is treated as investment property under IAS 40.

Recognition of investment properties takes place only when it is probable that the future economic benefits that are associated with the investment property will flow to the entity and the cost can be measured reliably. Investment properties are measured initially at cost, including transaction costs. The carrying amount includes the cost of replacing parts of an existing investment property at the time the cost was incurred if the recognition criteria are met; and excludes the costs of day-to-day servicing of an investment property.

Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the date of the consolidated statement of financial position. Gains or losses arising from changes in the fair value of investment properties are included in profit or loss in the year in which they arise.

Subsequent expenditure is included in the asset's carrying amount only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to profit or loss during the financial period in which they are incurred.

Investment property is carried at fair value, representing open market value determined triennially by external professionally qualified valuers. Fair value is adjusted, if necessary, for any difference in the nature, location or condition of the specific asset. If the information is not available, the Group uses alternative valuation methods such as recent prices on less active markets or discounted cash flow projections. Investment property is reviewed triennially by independent external evaluators.

Investment property is measured at cost until the earlier of the date construction is completed and the date at which fair value becomes reliably measurable.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

(k) Intangible assets

Intangible assets comprise separately identifiable intangible items arising from business combinations, computer software licences and other intangible assets. Intangible assets are recognised at cost. The cost of an intangible asset acquired in a business combination is its fair value at the date of acquisition. Intangible assets with a definite useful life are amortised using the straight-line method over their estimated useful economic life, generally not exceeding 20 years.

Intangible assets with an indefinite useful life are not amortised. Generally, the identified intangible assets of the Group have a definite useful life. At each reporting date, intangible assets are reviewed for indications of impairment or changes in estimated future economic benefits. If such indications exist, the intangible assets are analysed to assess whether their carrying amount is fully recoverable.

An impairment loss is recognised if the carrying amount exceeds the recoverable amount. The Group chooses to use the cost model for the measurement after recognition.

(a) Computer software licences

Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised on the basis of the expected useful lives. Software has a maximum expected useful life of 4 years.

(b) Other intangible assets

Other intangible assets consist of customer relationships (core deposit intangibles). Other intangible assets are initially recognised when they are separable or arise from contractual or other legal rights, the cost can be measured reliably and, in the case of intangible assets not acquired in a business combination, where it is probable that future economic benefits attributable to the assets will flow from their use. The value of intangible assets which are acquired in a business combination is generally determined using income approach methodologies such as the discounted cash flow method. Other intangible assets are stated at cost less amortisation and provisions for impairment, if any, plus reversals of impairment, if any. They are amortised over their useful lives in a manner that reflects the pattern to which they contribute to future cash flows, generally over 12 years.

(l) Impairment of other non-financial assets

Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash generating units).

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(m) Income tax

(a) Current tax

Income tax payable (receivable) is calculated on the basis of the applicable tax law in the respective jurisdiction and is recognised as an expense (income) for the period except to the extent that current tax related to items that are charged or credited in other comprehensive income. In these circumstances, current tax is charged or credited to other comprehensive income.

Where tax losses can be relieved only by carry-forward against taxable profits of future periods, a deductible temporary difference arises. Those losses carried forward are set off against deferred tax liabilities carried in the consolidated statement of financial position.

The Group does not offset income tax liabilities and current income tax assets.

(b) Deferred tax

Deferred income tax is provided in full on temporary differences arising between the tax base of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the reporting date and are expected to apply when the related deferred tax asset is realised or the deferred income tax liability is settled.

The principal temporary differences arise from depreciation of property and equipment, amortisation of intangible assets and their tax base, unutilised tax losses and pension gains. However, the deferred tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither the accounting, nor taxable profit or loss.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

(n) Financial liabilities

The Group's holding in financial liabilities are at amortised cost. Financial liabilities are derecognised when extinguished.

Financial liabilities measured at amortised cost are deposits from Groups or customers and debt securities in issue for which the fair value option is not applied.

(o) Borrowings

Borrowings are recognised initially at fair value, being their issue proceeds (fair value of consideration received) net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between proceeds net of transaction costs and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(p) Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of a past event, it is more likely that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

(q) Redeemable preference shares

Preference shares which are mandatorily redeemable on a specific date are classified as liabilities. The dividend on these preference shares are recognised in profit or loss.

(r) Employee benefits

Pension obligations

The Group operates a defined benefit plan. The scheme is funded through payments to trustee-administered funds, determined by periodic actuarial calculations. The plan is registered in St. Lucia and is regulated by the Insurance Act, 1994 which was enacted in 1995. A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. The pension obligation valuations are undertaken annually.

The Group's policy is to fully fund the pension and to meet any funding shortfalls over a period of ten years following regular periodical actuarial reviews.

The asset recognised in the consolidated statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the reporting date less the fair value of plan assets. The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method. Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding net interest and the return on plan assets, are recognised immediately in the consolidated statement of financial position with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in the consolidated profit or loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Group recognises restructuring-related costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Group recognises the following changes in the net defined benefit obligation under 'operating expenses' in profit or loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements
- Net interest expense or income

The pension plan is exposed to inflation risk, interest rate risk and changes in the life expectancy for pensioners.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(s) Employee benefits...continued

<u>Termination benefits</u>

Termination benefits are payable when employment is terminated before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognises termination benefits when it is demonstrably committed to either: terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal; or providing termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than 12 months after the reporting date are discounted to present value.

(t) Guarantees and letters of credit

Guarantees and letters of credit comprise undertakings by the Group's Grouping entities to pay bills of exchange drawn on customers. The Bank expects most guarantees and letters of credit to be settled simultaneously with the reimbursement from the customers. Such financial guarantees are given to banks, financial institutions and other bodies on behalf of customers.

The fair value of a financial guarantee at the time of signature is zero because all guarantees are agreed on arm's length terms and the value of the premium agreed corresponds to the value of the guarantee obligation. No receivable for the future premiums is recognised. Any increase in the liability relating to guarantees is reported in profit or loss within other operating expenses.

(u) Fiduciary activities

The Group commonly acts a trustees and in other fiduciary capacities that result in the holding and placing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions. These assets and income arising thereon are excluded from these consolidated financial statements, as they are not assets of the Group.

(v) Share capital

(i) Share issue costs

Incremental costs directly attributable to the issue of new shares or options or to the acquisition of a business are shown in equity as a deduction, from the proceeds.

(ii) Dividends on ordinary shares

Dividends on ordinary shares are recognised in equity in the period in which they are declared.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(w) Interest income and expense

Interest income and expense are recognised in profit or loss for all financial instruments measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

(x) Fee and commission income

Fees and commissions are generally recognised on an accrual basis when the service has been provided. Loan commitment fees for loans that are likely to be drawn down are deferred (together with related direct costs) and recognised as an adjustment to the effective interest rate on the loan. Commission and fees arising from negotiating, or participating in the negotiation of, a transaction for a third party, such as the arrangement of the acquisition of shares or other securities or the purchase or sale of a business, are recognised on completion of the underlying transaction. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts, usually on a time apportioned basis. Asset management fees related to investment funds are recognised rateably over the period the service is provided. The same principle is applied for financial planning and custody services that are continuously provided over an extended period of time.

(y) Dividend income

Dividend income is recognised when the entity's right to receive payment is established.

(z) Foreign currency translation

Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are presented in thousands of Eastern Caribbean dollars, which is the Company's functional and the Group's presentation currency.

Transactions and balances

Foreign currency transactions that are transactions denominated, or that require settlement in a foreign currency are translated into the functional currency using the exchange rates prevailing at the dates of the transactions.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies... continued

(z) Foreign currency translation... continued

Monetary items denominated in foreign currency are translated with the closing rates as at the reporting date. Non-monetary items measured at historical cost denominated in a foreign currency are translated with the exchange rate as at the date of initial recognition.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

In the case of changes in the fair value of monetary assets denominated in foreign currency classified as available-for-sale, a distinction is made between translation differences resulting from changes in amortised cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in the amortised cost are recognised in profit or loss, and other changes in the carrying amount, except impairment, are recognised in other comprehensive income. Translation differences on non-monetary financial instruments, such as equities held at fair value through profit or loss, are reported as part of the fair value gain or loss. Translation differences on non-monetary financial instruments, such as equities classified as available-for-sale financial assets, are included in the other comprehensive income.

(zi) Leases

Policy applicable from January 1, 2019

The Group assesses whether a contract is or contains a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group uses the definition of a lease in IFRS 16.

Definition of a lease

A Group company is the lessee

1) Right-of-Use Asset

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or the cost of the right-of-use asset reflects that the Group will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment disclosed in note (i). In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

(zi) Leases ... continued

2) Lease Liability

The lease liability is initially measured at the present value of the lease payments to be made over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

A Group company is the lessor

When the Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Group makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

The Group recognises lease payments received under operating leases as income on a straight-line basis over the lease term as part of 'other revenue'. Generally, the accounting policies applicable to the Group as a lessor in the comparative period were not different from IFRS 16.

Short-term leases and Low value leases

Short-term leases are leases with a lease term of twelve (12) months or less and containing no purchase options. A low value lease is a lease agreement where the underlying asset has a low value when new.

Instead of applying the recognition requirements of IFRS 16, a lessee may elect to account for such lease payments of such leases as an expense on a straight-line basis over the lease term or another systematic basis.

The Group used a number of practical expedients when applying IFRS 16 to leases previously classified as operating leases under IAS 17. In particular the Group:

- Did not recognise the right-of-use assets and liabilities for leases for which the lease term ends within 12 months of the initial application date of January 1, 2019.
- Did not recognise the right-of-use assets and liabilities for leases where the lease asset was not physically distinct from the asset. IFRS 16:5, 6 & 8 states that A capacity portion of a lease of an asset is still an identified asset if it is physically distinct (e.g. a floor of a building). A capacity or other portion of an asset that is not physically distinct is not an identified asset, unless it represents substantially all the capacity such that the customer obtains substantially all the economic benefits from using the asset (IFRS 16: B20). These leases therefore did not fall within the scope of IFRS 16.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

(zi) Leases ... continued

Policy applicable before January 1, 2019

A Group company is the lessee

The leases entered into by the Group were primarily operating leases. The total payments made under operating leases were charged to profit or loss on a straight-line basis over the period of the lease.

When an operating lease is terminated before the lease period is expired, any payment required to be made to the lessor by way of penalty is recognised as an expense in the period in which the termination takes place.

A Group company is the lessor

Assets leased out under operating leases are included in investment properties in the consolidated statement of financial position. They are depreciated over the expected useful life. Rental income is recognised in profit or loss on a straight-line basis over the period of the lease.

Impact on transition

On the initial application date of January 1, 2019, the Group did not recognise additional right –of-use assets and lease liabilities as the lease term expired within one year of the date of initial application and the impact recognition would not result in a material impact on the financial results at January 1, 2019. Application of the standard was therefore applied at December 31, 2019.

(zii) Financial instruments

Financial instruments carried on the consolidated statement of financial position include cash resources, investment securities, loans and advances to customers, deposits with other banks, deposits from banks, due to customers and borrowings. The particular recognition methods adopted are disclosed in the individual policy statement associated with each item.

(ziii) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is the person or group that allocates resources to and assesses the performance of the operating segments of an entity. The Group has determined the Company's Board of Directors as its chief operating decision maker.

All transactions between business segments are conducted on an arm's length basis, with intra-segment revenue and costs being eliminated in head office. Income and expenses directly associated with each segment are included in determining business segment performance.

In accordance with IFRS 8, the Group had one reportable segment: Bank of St. Lucia Limited.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

3 Financial risk management

Strategy in using financial instruments

The Group's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business, and the operational risks are an inevitable consequence of being in business. The Group's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Group's financial performance.

The Group's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Group regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

The Board of Directors ensures a strong quality of risk management and risk management processes, to ensure the safety and stability of the Bank and the banking system. In ensuring the overall responsibility for the soundness of the Bank, it has appointed a Risk Management Committee. The purpose of the Board's Risk Management Committee is to assist the Board to oversee the risk profile and approve the risk management framework of the Bank, within the context of its risk appetite and determined strategy determined. The Risk Management Committee relies on the efforts of the Risk Management and Compliance Services department, which coordinates the implementation of the Board approved Risk Management Framework. This department provides timely reports to the Board Committee; analytical support and guidance to the executive management in formulating risk management strategies and making functional risk decisions; supports management and business units in implementing the approved Risk Management Policies and processes; and ensure that they are integrated into the business operations and with Internal Control and compliance processes.

The most important types of risk are credit risk, liquidity risk, market risk and other operational risk. Market risk includes currency risk and interest rate risk.

Credit risk

Credit risk is the risk of suffering financial loss, should any of the Group's customers, or market counterparties fail to fulfill their contractual obligations to the Group. Credit risk arises mainly from commercial and consumer loans and advances, credit cards, and loan commitments. Credit risk can also arise from credit enhancement provided, such as credit financial guarantees, letters of credit, endorsements and acceptances.

The Group is also exposed to other credit risks arising from balances with central bank, deposits with other banks and non-bank financial institutions, investments in debt securities, pledged assets, other assets excluding prepayments and other exposures arising from its trading activities ('trading exposures'), including non-equity trading portfolio assets.

Loans and advances to customers

Impairment provisions are provided for losses based on an expected credit loss model using counterparty probabilities of default across the various loan categories. Significant changes in the economy, or in the health of particular industry segment that represents a concentration in the Group's portfolio, could result in losses that are different from those provided for at the reporting date. Management therefore carefully manages its exposure to credit risk in a defined and calculated manner through regular analysis of the ability of its borrowers to meet repayment obligations and taking collateral as securities on advances.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

3 Financial risk management...continued

Credit risk

Debt securities and other bills

For debt securities and treasury bills, external rating provided by the globally known Big Three credit rating agencies of Standard & Poor's (S&P) or Moody's and Fitch Group, along with that of CariCRIS based in Trinidad are used by Bank Treasury for managing the credit risk exposures. The investments in securities and bills rated by such entities as Investment Grade, are viewed as a way to gain additional wealth for the Bank, whilst effectively manage the associated risks, they are therefore a better credit quality mapping and maintain a readily available source to meet the funding requirements at the same time.

Cash and balances with Central Bank

Credit risk from balances with banks and financial institutions is managed by the Group in accordance with the Group's Board approved policy. Counterparty credit limits are reviewed by the Group's Risk Department on an annual basis, and may be updated throughout the year subject to approval of the Group's Investment Committee and where necessary The Board of Directors. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through potential counterparty's failure to make payments.

Risk limit control and mitigation policies

The Group manages, limits and controls concentrations of credit risk wherever they are identified – in particular, to individual counterparties and groups, and to industries and countries.

The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to the industry segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review, when considered necessary by the Board of Directors.

Exposure to credit risk is also managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate.

Some other specific control and mitigation measures are outlined below.

Collateral

The Group employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advanced, which is common practice. The Group implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans and advances are:

- Mortgages over residential properties;
- Charges over business assets such as premises, inventory and accounts receivable; and
- Charges over financial instruments such as debt securities and equities.

The Group's credit risk management policies include requirements relating to collateral valuation and management, including verification requirements and legal certainty. Valuations are updated periodically depending upon the nature of the collateral. Management monitors the market value of collateral and requests additional collateral in accordance with the underlying agreement during its periodic review of loan accounts in arrears. Policies are in place to monitor the existence of undesirable concentration in the collateral supporting the Group's credit exposure.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

3 Financial risk management...continued

Credit risk...continued

Collateral...continued

Longer-term finance and lending to corporate entities are secured; individual credit facilities are generally secured. In addition, in order to minimize the credit loss, the Group will seek additional credit collateral from the counterparty as soon as impairment indicators are noticed for the relevant individual loans and advances.

Collateral held as security for financial assets other than loans and advances is determined by the nature of the instrument. Debt securities, treasury and other eligible bills are generally unsecured.

Risk limit control and mitigation policies

The Group manages, limits and controls concentrations of credit risk wherever they are identified – in particular, to individual counterparties and groups, and to industries and countries.

The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to the industry segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review, when considered necessary by the Board of Directors.

Exposure to credit risk is also managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate.

Some other specific control and mitigation measures are outlined below.

The Group employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advanced, which is common practice. The Group implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans and advances are:

- Mortgages over residential properties;
- Charges over business assets such as premises, inventory and accounts receivable; and
- Charges over financial instruments such as debt securities and equities.

The Group's credit risk management policies include requirements relating to collateral valuation and management, including verification requirements and legal certainty. Valuations are updated periodically depending upon the nature of the collateral. Management monitors the market value of collateral and requests additional collateral in accordance with the underlying agreement during its periodic review of loan accounts in arrears. Policies are in place to monitor the existence of undesirable concentration in the collateral supporting the Group's credit exposure.

Collateral...continued

Longer-term finance and lending to corporate entities are secured; individual credit facilities are generally secured. In addition, in order to minimize the credit loss, the Group will seek additional credit collateral from the counterparty as soon as impairment indicators are noticed for the relevant individual loans and advances.

Collateral held as security for financial assets other than loans and advances is determined by the nature of the instrument. Debt securities, treasury and other eligible bills are generally unsecured.

Credit-related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit carry the same credit risk as loans. Documentary and commercial letters of credit – which are written undertakings by the Group on behalf of a customer authorising a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions.

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Group monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

Impairment and provisioning policies

The internal rating systems focus more on credit-quality mapping from the inception of the lending and investment activities. In contrast, impairment provisions are recognised for financial reporting purposes using a three-stage expected credit loss approach. Stages 1 and 2 credit losses are made for assets that are not credit impaired and stage ECLs are for assets which are credit impaired.

Management determines whether objective evidence of impairment exists based on the following criteria set out by the Group:

- Delinquency in contractual payments of principal or interest;
- Cash flow difficulties experienced by the borrower (e.g. equity ratio, net income percentage of sales);
- Breach of loan covenants or conditions;
- Initiation of bankruptcy proceedings;
- Deterioration of the borrower's competitive position; and
- Deterioration in the value of collateral.

See accounting policy in note 2 for further details on impairment of financial assets.

Debt securities, treasury bills and other eligible bills

The table below presents an analysis of debt securities and treasury bills by rating agency designation at 31 December 2019 and 2018, based on Standard & Poor's and Moody's ratings:

	Financial assets held for trading \$	Investment Securities \$	Pledged Assets	Treasury Bills \$	Total \$
At 31 December 2019					
A- to A+	-	167,480	-	-	167,480
Lower than A-	-	359,307	-	-	359,307
Unrated	21,368	148,953	8,266	12,880	191,467
-	21,368	675,740	8,266	12,880	718,254
At 31 December 2018					
A- to A+	-	190,260	-	-	190,260
Lower than A-	-	294,902	-	-	294,901
Unrated	18,623	163,519	8,189	17,409	207,740
_	18,623	648,681	8,189	17,409	692,902

The Group's balances held with other banks, non-bank financial institutions are held with reputable financial institutions, and as such, credit risk is deemed minimal.

Concentrations of risks of financial assets with credit exposure

(a) Geographical sectors

The Group operates primarily in Saint Lucia. Based on the country of domicile of its counterparties, exposure to credit risk is concentrated in these locations, except for investments which have other exposures, primarily in the United States of America.

(b) Industry sectors

The following table breaks down the Group's credit exposure at gross amounts without taking into account any collateral held or other credit support by the industry sectors of the Group's counterparties.

Market risk

The Group takes on exposure to market risks, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices. The Group's exposure to market risks arises from its non-trading and trading portfolios. Senior management of the Group monitors and manages market risk through the Asset Liability Committee which advises on financial risks and assigns risk limits for the Group.

Non-trading portfolios primarily arise from the interest rate management of the Group's retail and commercial banking assets and liabilities. Non-trading portfolios also consist of equity risks arising from the Group's available-for-sale investments (Note 14).

Currency risk

The Group takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. The Board of Directors sets limits on the level of exposure by currency and in total for both overnight and intra-day positions, which are monitored daily. The Group's exposure to currency risk is minimal since most of its assets and liabilities in foreign currencies are held in United States dollars. The exchange rate of the Eastern Caribbean dollar (EC\$) to the United States dollar (US\$) has been formally pegged at EC\$2.70 = US\$1.00 since 1974. The following table summarises the Group's exposure to foreign currency exchange rate risk at 31 December.

Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both fair value and cash flows risks. Interest margins may increase as a result of such changes but may reduce or create losses in the event that unexpected movements arise. The Board of Directors sets limits on the level of mismatch of interest rate repricing that may be undertaken.

3 Financial risk management...continued

Interest rate risk...continued

Cash flow interest rate risk arises from loans and advances to customers at variable rates. At 31 December 2019, if variable interest rates had been 0.5% higher/lower with all other variables held constant, post-tax profit for the year would have been \$496 (2018 – \$633) higher/lower, mainly as a result of higher/lower interest income on variable rate loans.

Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its obligations when they fall due as a result of customer deposits being withdrawn, payment of cash requirements from contractual commitments, or other cash outflows.

The Group is exposed to daily cash calls on its available cash resources from overnight deposits, current accounts, maturing deposits, loan draw-downs, and guarantees. The Group does not maintain cash resources to meet all of these needs, as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainty. The Board of Directors sets limits on the minimum proportion of maturing funds available to meet such calls and on the minimum level of interbank and other borrowing facilities that should be in place to cover withdrawals at unexpected levels of demand.

Liquidity risk management process

The matching and controlled mismatching of the contractual maturities and interest rates of assets and liabilities is fundamental to the management of the Group. It is unusual for banks to be completely matched as transacted business is often of uncertain term and of different types. An unmatched position potentially enhances profitability, but also increases the risk of losses.

The contractual maturities of assets and liabilities and the ability to replace, at an acceptable cost, interestbearing liabilities as they mature, are important factors in assessing the liquidity of the Group and its exposure to changes in interest rates and exchange rates.

Liquidity requirements to support calls under guarantees and standby letters of credit are considerably less than the amount of the commitment because the Group does not generally expect the third party to draw funds under the agreement. The total outstanding contractual amount of commitments to extend credit does not necessarily represent future cash requirements, since many of these commitments will expire or terminate without being funded.

Funding approach

Sources of liquidity are regularly reviewed to maintain a wide diversification by currency, geography, provider, product and term.

Assets held for managing liquidity risk

The Group holds a diversified portfolio of cash and investment securities to support payment obligations.

The Group's assets held for managing liquidity risk comprise cash and balances with central bank, certificates of deposit, government bonds that are readily acceptable in repurchase agreements, treasury and other eligible bills, loans and advances to financial institutions, loans and advances to customers and other items in the course of collection.

The Group would also be able to meet unexpected net cash outflows by selling investment securities and accessing additional funding sources.

Fair values of financial assets and financial liabilities

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Bank has access at that date. The fair value of a liability reflects its non-performance risk. The following methods and assumptions were used to estimate the fair value of financial instruments.

The fair values of cash resources, other assets and liabilities, cheques and other items in transit and due to other banks are assumed to approximate their carrying values due to their short term nature. The fair value of off-balance sheet commitments are also assumed to approximate the amounts disclosed in Note 44 due to their short term nature.

Due to customers

The estimated fair value of deposits with no stated maturity, which includes non-interest bearing deposits, is the amount repayable on demand. Deposits payable on a fixed date at rates which reflect market conditions and are assumed to have fair values which approximate carrying value.

Investment securities

Investment securities include interest bearing debt and equity securities held to maturity and available-forsale. Assets classified for sale are measured at fair value based on market prices or broker/dealer price quotations. Where this information is not available, fair value is estimated using quoted market prices for securities with similar credit maturity and yield characteristics.

Pledged assets

The estimated fair value of pledged assets are derived from market prices or broker/dealer quotations. Where this information is not available, fair value is estimated using quoted market prices for securities with similar credit maturity and yield characteristics.

Loans and advances

Loans and advances are net of provisions for impairment. The estimated fair values of loans and advances represent the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value.

The table below summarises the carrying amounts and fair values of those financial assets and liabilities not presented on the Group's statement of financial position at their fair value.

	Carrying value		Fair value	
	2019	2018	2019	2018
	\$	\$	\$	\$

(in thousands of Eastern Caribbean dollars)

3 Financial risk management... continued

Fair values of financial assets and financial liabilities...continued

Management assessed that cash and short term deposits, treasury bills, trade receivables, trade payables, repurchase agreements and other current liabilities approximate their carrying amounts largely due to the short term maturities of these instruments. The Group's interest-bearing borrowings and loans are determined by using Discounted Cash Flow method using the discount rate that reflects the average rates at the end of the period.

Fair value hierarchy

IFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources; unobservable inputs reflect the Group's market assumptions. These two types of inputs have created the following fair value hierarchy:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities. This level includes listed equity securities and debt instruments on exchanges such as Luxembourg, New York and Trinidad and Tobago.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 inputs for the asset or liability that are not based on observable market data (unobservable inputs). This level includes equity investments and debt instruments with significant unobservable components.

This hierarchy requires the use of observable market data when available. The Group considers relevant and observable market prices in its valuations where possible.

3 Financial risk management... continued

Fair values of financial assets and financial liabilities...continued

Fair value hierarchy...continued

The fair value of financial instruments traded in active markets is based on quoted market prices at the statement of financial position date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in Level 1. Instruments included in Level 1 comprise primarily DAX, FTSE 100 and Dow Jones debt securities classified as trading securities or available-for-sale.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter fixed income securities) is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.

Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments.
- Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

There were no transfers between levels in the fair value hierarchy during the year.

There were no gains or losses for the period included in profit or loss or comprehensive income for assets held at 31 December 2019.

Capital management

The Group's objectives when managing capital, which is a broader concept than the 'equity' on the face of statement of financial position, are:

- To comply with the capital requirements set by the regulators of the banking markets where the entities within the Group operate;
- To safeguard the Group's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital are monitored daily by the Group's management, employing techniques based on the guidelines developed by the East Caribbean Central Bank (the "Authority") for supervisory purposes. The required information is filed with the Authority on a quarterly basis.

The Authority requires each bank or banking group to hold the minimum level of the regulatory capital to the risk-weighted asset (the 'Basel capital adequacy ratio') at or above the internationally agreed minimum of 8%.

The Group's regulatory capital as managed by its Treasury is divided into two tiers:

- Tier 1 capital: share capital (net of any book values of the treasury shares), minority interests arising on consolidation from interests in permanent equity, retained earnings and reserves created by appropriations of retained earnings. The book value of goodwill is deducted in arriving at Tier 1 capital; and
- Tier 2 capital: qualifying subordinated loan capital, collective impairment allowances, unrealised gains arising on the fair valuation of equity instruments held as available-for-sale and fixed asset revaluation reserves (limited to 20% on Tier 1 capital).

Investments in associates are deducted from Tier 1 and Tier 2 capital to arrive at the regulatory capital.

The risk-weighted assets are measured by means of a hierarchy of five risk weights classified according to the nature of and reflecting an estimate of credit, market and other risks associated with each asset and counterparty, taking into account any eligible collateral or guarantees. A similar treatment is adopted for off-balance sheet exposure, with some adjustments to reflect the more contingent nature of the potential losses.

Basel capital adequacy ratio	22.15%	18.36%

Fiduciary activities

The Group provides investment management and advisory services to third parties, which involve the Group making allocation and purchase and sale decisions in relation to a wide range of financial instruments. Those assets that are held in a fiduciary capacity are not included in these consolidated financial statements. Some of these arrangements involve the Group accepting targets for benchmark levels of returns for the assets under the Group's care. At the statement of financial position date, the Group had financial assets under administration amounting to \$128,139 (2018 – \$102,753).

Notes to the Consolidated Financial Statements

4 Critical accounting estimates, and judgements in applying accounting policies

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Going concern

The Group's management is satisfied that it has the resources to continue in business for the foreseeable future. The Group's management is not aware of any material uncertainties that may cast significant doubt upon its ability to continue as a going concern.

Measurement of the expected credit loss allowance

The measurement of the expected credit loss allowance for financial assets measured at amortised cost and FVOCI is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g. the likelihood of customers defaulting and the resulting losses). Explanation of the inputs, assumptions and estimation techniques used in measuring ECL is detailed in note 2.

A number of significant judgements are also required in applying the accounting requirements for measuring ECL, such as:

- The Group's criteria for determining if there has been a significant increase in credit risk and so impairment allowances for financial assets should be measured on a LTECL basis
- Choosing appropriate models and assumptions for the measurement of ECL
- Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs
- Establishing the number and relative weightings of forward-looking macroeconomic scenarios for each type of product or market and the associated ECL; and
- Establishing groups of similar financial assets for the purposes of measuring ECL.

Impairment of assets carried at fair value

The Group determines that available-for-sale and held for trading equity investments are impaired when there has been a significant or prolonged decline in the fair value below its cost. This determination of what is significant or prolonged requires judgement. In making this judgement, the Group evaluates among other factors, the normal volatility in share price. In addition, impairment may be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance, changes in technology and operational and financing cash flows.

The Group individually assesses available-for-sale debt securities for objective evidence of impairment. If an impaired instrument has been renegotiated, interest continues to be accrued on the reduced carrying amount of the asset and is recorded as part of "interest income". If the fair value of the instrument increases in a subsequent year, the impairment loss is reversed through profit or loss.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

4 Critical accounting estimates, and judgements in applying accounting policies...continued

Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less cost of disposal is based on available data from binding sales transactions, conducted at arm's length for similar assets or observable market prices less incremental cost of disposing of the asset. The value in use calculation is based on a DCF model. The recoverable amount is sensitive to the discount rate used for DCF model as well as the future cash inflows.

Fair value of financial instruments

For financial instruments, where recorded current market transactions or observable market data are not available at fair value using valuation techniques, fair value is determined using a valuation model that has been tested against prices or inputs to actual market transactions and using the group's best estimates of the most appropriate model assumptions.

Deferred taxes

In calculating the provision for deferred taxation, management uses judgment to determine the possibility that future taxable profits will be available to facilitate utilization of temporary tax differences which may arise.

Revaluation of land and buildings and investment property

The Group measures its land and buildings and investment property at revalued amounts with changes in fair value being recognized in other comprehensive income and in profit or loss respectively. The Group engages independent valuation specialists to determine fair value of its land and buildings. The valuer uses judgment in the application of valuation techniques such as replacement cost, capitalization of potential rentals and the market price of comparable properties, as applicable in each case.

Retirement benefits

The present value of the retirement benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of pension obligations. The most sensitive assumptions used in determining the net cost (income) for pensions include the discount rate and future salary increases. The Group determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the Group considers the interest rates of Government that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related pension liability. A sensitivity analysis for each significant actuarial assumption as of the end of the reporting period is shown below:

Notes to the Consolidated Financial Statements

-		Increase	Decrease
		\$	\$
Discount rate	1%	10,262	7,153
Future salary increases	1%	4,563	3,376
Increase in average life expectancy	1 year	468	· -

2018:

Assumption	Sensitivity Level	Impact on defined benefit obligation	
-	-	Increase	Decrease
		\$	\$
Discount rate	1%	9,922	7,166
Future salary increases	1%	4,563	3,876
Increase in average life expectancy	1 year	458	-

Corporate income taxes

Significant estimates are required in determining the provision for income taxes. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions. The deferred tax assets recognised at 31 December 2019 have been based on future profitability assumptions over a five year horizon. In the event of changes to these profitability assumptions, the tax assets recognised may be adjusted.

5 Segment analysis

Segment reporting by the Group was previously prepared in accordance with IFRS 8, 'Operating segments'.

Following the management approach of IFRS 8, operating segments are reported in accordance with the internal reporting provided to the Company's Board of Directors (the chief operating decision-maker), which is responsible for allocating resources to the reportable segments and assessing their performance.

The Group previously had five operating segments which met the definition of reportable segment under IFRS 8. Two of these segments were disposed of in 2017 as indicated below:

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

5 Segment analysis...continued

- Bank of St. Lucia Limited (BOSL) operating in St. Lucia and provides domestic banking services.
- Bank of St. Lucia Limited- Investment Banking Services (BOSL GINV)-incorporating Capital market activities and Merchant Banking.
- Bank of St. Vincent and the Grenadines Limited (BOSVG) operating in St. Vincent and the Grenadines and provides domestic banking services. On June 30th 2017, the Group disposed of its majority holding in Bank of St. Vincent and the Grenadines and retained a 20% as an investment in associate.
- Bank of St. Lucia International Limited incorporating International banking including International corporate and International personal banking, and a wide range of other services to International clients. On March 10, 2017 the Group disposed of its 100% holding in Bank of St. Lucia International Limited.
- Other comprises of the holding company of the Group.

The Group's segment operations are all financial with a majority of revenues being derived from interest. The Company's Board of Directors relies primarily on net interest income to assess the performance of the segment, therefore the total interest income and expense for all reportable segments is presented on a net basis.

The revenue from external parties reported to the Company's Board of Directors is measured in a manner consistent with that in profit or loss.

Revenue from external customers is recorded as such and can be directly traced to each business segment.

The Group's management reporting is based on a measure of operating profit comprising net interest income, loan impairment charges, net fee and commission income, other income and non-interest expenses. This measurement basis excludes the effects of non-recurring expenditure from the operating segments such as restructuring costs, legal expenses and goodwill impairments when the impairment is the result of an isolated, non-recurring event. As the Company's Board of Directors reviews operating profit, the results of discontinued operations are not included in the measure of operating profit.

The information provided about each segment is based on the internal reports about segment profit or loss, assets and other information, which are regularly reviewed by the Company's Board of Directors.

Segment assets and liabilities comprise operating assets and liabilities, being the majority of the consolidated statement of financial position. Transactions between business segments are on an arms length basis and are eliminated on consolidation and reflected in the consolidations entries.

There were no revenues derived from transactions with a single external customer that amount to 10% or more of the Group's revenue.

(in thousands of Eastern Caribbean dollars)

17 Property and equipment... continued

The major component of land and buildings were revalued in 2017 by an independent valuer based on open market value and a management internal specialist performed a review of the remaining buildings. The valuation indicates that the market value does not differ materially from the carrying amount of the respective assets in the books of the Group.

The historical cost of land and buildings is:

		2019 \$	2018 \$
	Cost Accumulated depreciation based on historical cost	41,418 (22,436)	38,913 (21,385)
	Depreciated historical cost	18,982	17,528
18	Investment properties		
	Tandan dhagaga	2019 \$	2018 \$
	Land and buildings At beginning of year Disposal of building	31,955	37,455 (5,500)
	At end of year	31,955	31,955

The investment properties are valued annually based on open market value by an independent, professionally qualified valuer. Comparative analysis was used to determine the market value of the investment properties.

The Group has no restrictions on the realisability of its investment properties and no contractual obligation to either purchase, construct or develop investment properties or for repairs maintenance and enhancements.

The following amounts have been recognised in profit or loss:

	2019 \$	2018 \$
Rental income Direct operating expenses arising from investment properties that	2,589	3,110
generated rental income	(692)	(354)
	1,897	2,756

(in thousands of Eastern Caribbean dollars)

19 Right-of-use lease asset

The Group leases a facility to house operations of one of the Branches of its subsidiary. The lease typically run for a period of two years, with an option to renew the lease at expiration. Lease payments are negotiated with every new lease contract to reflect market rentals. The lease was entered into many years ago and was previously classified as an operating lease.

Right-of-Use assets related to leased properties:

22 Retirement benefit asset

The amounts recognised in the consolidated statement of financial position are determined as follows:

	2019 \$	2018 \$
Fair value of plan assets Present value of funded obligation	72,741 (57,709)	64,995 (54,549)
Asset in the consolidated statement of financial position	15,032	10,446
Movement in the asset recognised in the consolidated statement of fine. The movement in the defined benefit obligation over the year is as for	•	

	2019 \$	2018 \$
Beginning of year	54,549	48,602
Current service cost	1,463	1,327
Interest cost	4,072	3,750
Employee contribution	825	819
Actuarial losses/(gains)	(1,856)	1,546
Benefits paid	(1,344)	(1,495)
End of year	57,709	54,549

The movement in the fair value of plan assets of the year is as follows:

	2019 \$	2018 \$
Beginning of year	64,995	62,217
Actual return on plan assets	5,627	808
Employer contributions	2,943	2,920
Employee contributions	825	819
Benefits paid	(1,344)	(1,495)
Administrative expenses	(305)	(274)
End of year	72,741	64,995

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

Retirement benefit assetcontinued		
	2019 \$	2018 \$
Net asset at beginning of year Net periodic cost Contributions paid Effect on statement of comprehensive income	10,446 (1,051) 2,943 2,694	13,615 (611) 2,920 (5,478)
Net asset at end of year	15,032	10,446
Benefit cost		
	2019	2019

Current service cost	1,463	1,327
Net interest on net defined benefit asset	4,072	3,750
Expected return on plan assets	(4,789)	(4,740)
Administration expenses	305	274
Net periodic cost at end of year	1,051	611

The amounts recognised in the consolidated statement of comprehensive income are as follows:

	2019 \$	2018 \$
Gain from change in assumptions	-	672
(Loss)/gain from experience	(1,856)	874
Expected return on plan assets	4,789	4,740
Actual return on plan assets	(5,627)	(808)
	(2,694)	5,478
The principal actuarial assumptions used were as follows:		
	2019 %	2018 %
Discount rate	7.25	7.50
Future promotional salary increases	4.5	3.25-4.5
Future inflationary salary increases	1.75	1.75

Assumptions are set to approximate the expected average rates over the long term and may not be appropriate in any specific year.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

22 Retirement benefit asset...continued

Plan assets allocation is as follows:

	2019 %	2018 %
Debt securities	83	82
Equity securities Other	10 7	10 8
Outer	100	100

The pension plan assets do not include assets or ordinary shares of the Group.

Mortality rate

Assumptions regarding future mortality experience are set based on advice, published statistics and experience in each territory.

The average life expectancy in years of a pensioner retiring at age 60 after the statement of financial position date is as follows:

	2019	2018
Male	24.86	24.77
Female	26.94	26.90

The assumption adopted for the expected return on assets considers the actual assets the Plan holds and the outlook for returns on various asset classes. This assumption is usually derived by looking at actual asset mix and making assumptions about returns relative to the "baseline" of the plan's discount rate, which are taken to be the returns on government bonds.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

22 Retirement benefit asset...continued

The major categories of the fair value of the total plan assets are as follows:

	2019 \$	2018 \$
	·	·
Investments quoted in active markets:		
Quoted equity investments:	40	2.4
- Energy	42	34
- Consumer staples	3,103	2,618
- Other	4,302	3,674

		_	63,844	_	71,519

Security for loans issued by the Group includes a first hypothecary obligation over the building and property known as the Financial Center, which is located at #1 Bridge Street.

In August 2016, the holding company issued a ten (10) year, EC\$50 million unsecured bond via private placement with the purpose of capitalising its wholly -owned subsidiary of Bank of Saint Lucia Limited. The bond which qualifies as tier II capital, pays interest semi-annually at the rate of 7.25%. Principal repayments are to be amortised by way of 10 semi-annual payments over the last 5-year term of the instrument. The National Insurance Corporation was the sole purchaser of the bond.

(in thousands of Eastern Caribbean dollars)

30	Reserves		
		2019	2019
		\$	\$
	(a) General reserve	62,957	62,957
	(b) Statutory reserve	111,173	101,587
	(c) Student loan guarantee fund reserve	820	739
	(d) Special reserve	2,034	2,034
	(e) Retirement benefit reserve	15,032	10,445
	(f) Contingency reserve	27,504	28,615
	Total reserves at 31 December	219,520	206,377
	Movements in reserves were as follows:		
		2019	2018
		\$	\$
	(a) General		
	At beginning of the year	62,957	62,957
	At end of the year	62,957	62,957

It is the policy of the Group to maintain a general reserve for reinvestment in operations. Transfers to the reserve are based on a maximum of 35% of the consolidated Group's profit for the year after transfers to statutory reserve.

	2019 \$	2018 \$
(b) Statutory	Ψ	Ψ
At beginning of the year	101,587	93,652
Transferred from retained earnings	9,586	7,935
At end of the year	111,173	101,587

Pursuant to Section 45 (1) of the Banking Act 2015, Banking institutions shall, out of its net profits of each year transfer to that reserve a sum equal to not less than twenty percent of such profits whenever the amount of the fund is less than one hundred percent of the paid-up capital of the Banking institutions.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

30 Reserves

	2019 \$	2018 \$
(c) Student loan guarantee fund		
At beginning of the year	739	7,627
Transferred from retained earnings	-	133
Contributions	81	-
Capital drawing		(7,021)
At end of the year	820	739

This is a non-distributable reserve. Transfers are made to the reserve at an amount equal to the net profit of the subsidiary Student Loan Guarantee Fund Limited.

	2019	2018
	\$	\$
(d) Special		
At beginning and end of the year	2,034	2,034

The finance contract between the European Investment Bank ("EIB") and the former St. Lucia Development Bank, now assumed by Bank of Saint Lucia Limited, requires the institution to establish and maintain a special reserve. Annually, an amount as specified under Section 6.05 of the Contract is credited to the reserve.

	2019 \$	2018 \$
(e) Retirement benefit At beginning of the year Transferred from/(to) retained earnings	10,445 4,587	13,615 (3,170)
At end of the year	15,032	10,445

The retirement benefit reserve is a non-distributable reserve. It is the Group's policy to match the amount of fair value of retirement benefit plan assets with the retirement benefit reserve.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

30 Reserves... continued

	2019 \$	2018 \$
(f) Contingency reserve At beginning of the year	28,615	4,535
Transferred (to)/from retained earnings Adjustment on adoption of IFRS 9	(1,111)	7,481 16,599
At end of the year	27,504	28,615

The contingency reserve fund is created as an appropriation from retained earnings to set aside a portion of profits against loan loss provisions. This reserve will be funded annually to the extent that the reserve fund does not exceed 100% of non-performing loans.

31 Related party transactions and balances

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party by making financial and operational decisions.

Interest income and interest expense with related parties were as follows:

	2019		2018	
	Income \$	Expense \$	Income \$	Expense \$
Government of Saint Lucia	2,724	595	1,475	697

For the year ended 31 December 2019

(in thousands of Eastern Caribbean dollars)

39 Income tax expense/(recovery)

Tax on the Group's profit before income tax differs from the theoretical amount that would arise using the statutory tax rate of 30% as follows:

	2019 \$	2018 \$
Profit for the year before income tax and dividends	56,541	45,612
Tax calculated at the applicable tax rate of 30% Tax effect of income not subject to tax Deferred tax asset recognised/ unrecognised on tax losses Tax effect of expenses not deductible for tax purposes Tax effect of utilised losses	16,962 (5,045) (4,901) (462) (5,295)	13,683 (10,105) (1,592) 260 (1,891)
	1,259	355

The Group has unutilised tax losses of \$26,818 (2018 – \$28,133) for which a deferred tax asset of \$8,046 (2018: \$8,440) has been recognised due to the certainty of its recoverability. Unutilized tax losses may be carried forward and deducted against 50% of future taxable income within six years following the year in which the losses were incurred. The losses are based on income tax returns, which have not yet been assessed by the Inland Revenue Department. The Group also has unutilised tax losses of \$98,243 (2018 – \$121,889) for which no deferred tax asset has been recognised.

Tax losses expire as follows:

Tax losses expire as follows.	2019 \$	2018 \$
2019 2020 2021 2022	6,367 13,620 105,079	24,957 6,367 13,619 105,079
	125,066	150,022

There was no income tax effect relating to components of other comprehensive income.

40 Earnings per share

Basic and diluted

The calculation of basic earnings per share is based on the profit from continuing operations attributable to ordinary shareholders of \$54,991 (2018 – \$44,966) and 24,465 (2018 – 24,465) shares, being the weighted average number of ordinary shares in issue in each year. For the purpose of calculating diluted earnings per share, the profit for the year attributable to equity holders of the company is the profit for the year after deducting preference dividends of \$291 (2018 – \$291).

43 Principal subsidiary undertakings

11morpul sussianity undertunings	Holding	Holding		
	2019 %	2018 %		
Bank of Saint Lucia Limited	100	100		

^{**} Allotment of shares had not been completed at the reporting date.

As part of its strategic objectives, the local companies of the ECFH Group namely; Bank of Saint Lucia Limited and ECFH Global Investment Solutions were amalgamated with ECFH holding company in October 2016, and this amalgamated entity continued as Bank of Saint Lucia Limited.

Another company named East Caribbean Financial Holding Company Limited was then incorporated at the same time to hold the shares of Bank of Saint Lucia Limited, and Bank of Saint Vincent and the Grenadines Limited. On June 30, 2017, the group disposed of its majority holding in Bank of St. Vincent and the Grenadines Limited, as part of its strategic objective to focus on its local share of Bank of St. Lucia Limited.

44 Cumulative preference shares

	No. of shares	2019 \$	No. of Shares	2018 \$
7% Cumulative preference shares				
Authorised:				
11,550,000 preference shares				
At beginning and end of year	830,000	4,150	830,000	4,150

The preference shares are non-voting and are to be converted to ordinary shares. The Group has imposed certain restrictions with respect to the number of preference shares that can be converted to ordinary shares in any one year.

The Board of Directors of the Company and the National Insurance Corporation have formally agreed that future conversions of preference shares should be done at \$5 per share.

Dividends declared and unpaid on the preference shares during the year amounted to \$291 (2018 – \$291).

45 Comparatives

Certain balances were reclassified in the prior year to meet the current year's presentation. These changes had no impact on the total assets or total equity.

46 Dividend

The Board of Directors proposed a dividend in respect of the 2019 financial year end of \$0.25 for each unit of paid up share capital, or EC\$6,116 (2018: 7,340). The financial statements for the year ended 31 December 2019 do not reflect this proposed dividend which will be accounted for in equity as an appropriation of retained earnings in the year ending 31 December 2020.

47 Subsequent event

• Defined Benefit (DB) Pension Plan

On January 1, 2020 the Group completed the first phase of transitioning from a Defined Benefit (DB) Pension plan to a Defined Contribution (DC) Plan. The objectives of the transition are to

- 1. Control the financial risk of a growing defined benefit plan to the Company,
- 2. Improve portability of retirement benefits for staff and
- 3. Introduce harmonization with the National Insurance Corporation.

The first phase included the closure of the DB fund to future benefit accruals and the commencement of the DC section of the Scheme for future benefit accruals. Existing members of the DB Scheme will continue to be entitled to accrued pension benefits in the scheme for pensionable service prior to January 1, 2020.

The second phase will include providing the staff with options to either retain their existing entitlement to a DB benefit accrued up to December 31, 2019 or to transfer their entitlements under the DB to the DC section of the scheme. The Group is still in the process of finalizing the structure of the transfer option. The Group is unable to quantify the potential impact of the transfer as at the reporting date due to the uncertainly of the probable outcome.

To the extent that members transfer their accrued benefits from the DB to the DC, there will be a reduction in the retirement benefit asset and a corresponding expense, however, the Bank obviates itself from any future obligation.

To the extent that employees retain their accrued benefits as at December 31, 2019 on the DB plan the group will continue to incur any funding shortfalls that may arise based on tri-annual actuarial valuations.

47 Subsequent event...continued

• Coronavirus (COVID-19)

On March 11, 2020, the World Health Organization declared the breakout of a coronavirus, (COVID-19), a pandemic. This followed reports from China, commencing on December 31, 2019, of dozens of cases of pneumonia of unknown cause. This ailment has since been linked to COVID-19, and the virus has spread to over 190 countries resulting in excess of 21,000 deaths from more than 478,000 cases. Medical experts expect the spread to continue before any abatement.

By March 2020, Saint Lucia reported thirteen(13) imported cases of the virus and a significant proportion of tourism-related businesses have either shut down or announced impending shut downs as the local government and the home governments implemented measures to limit the spread of the disease in their respective countries. Because of the importance of the tourism industry to the local economy, government is leading a series of initiatives with certain local entities, including the Eastern Caribbean Central Bank (ECCB) and the Eastern Caribbean Currency Unit (ECCU) Bankers' Association, designed to alleviate the financial impact on both the commercial sector and employees. These measures are expected to include a moratorium on the repayment of loans (principle and interest) by all member banks for a period of up to six months in addition to waiver of late fees and charges.

At the current time, we are unable to quantify the potential effects of the pandemic on our future financial statements, if any, as this will depend on future developments, including but not limited to (i) the duration and spread of the outbreak, (ii) travel restrictions and advisories, (iii) the effects on the financial markets, and (iv) the effects on the economy overall, all of which are highly uncertain and cannot be predicted.
